## ITALIAN ARCHBISHOP BECOMES NEW POPE

Cardinal Achille Ratti, archbishop of Milan, was proclaimed pope in succession to the late Benedict XV. on Monday morning, and has taken the name of Pius XI.

Pope Pius XI, previously Cardinal Achille Ratti, archbishop of Milan, was for several years papal nuncio in Poland where his discharge of important ecclesiastical functions, when the Polish question became acute, earned him the esteem of Benedict XV and the gratitude of Vatican authorities. It was because of this service that the red hat was conferred upon him on June 16, 1921, when a similar honor was bestowed on Cardinal Laurenti.

The new pope was born in Desio, Italy, on March 31, 1857. For many years he was librarian of the Ambrosian library and archives at Milan. Later he became librarian of the Vatican. In this position he remained until the new republic of Poland established official diplomatic relations with the Vatican at which time he was appointed archbishop and was assigned to Poland as the representative of the holy see.

That country was then torn with the estrangements from religion brought about by the communist propaganda from soviet Russia, and Ratti counteracted the spread of radicalism. He also won the esteem of Polish Catholics by his efforts in behalf of destitute children orphaned during the war.

As the archbishop of Milan he presided over one of the most important arch-dioceses in Italy. The city being a great industrial centre, one of its main requisites was that the cardinal shall possess a thorough knowledge of political and social problems. He is big physically and is reported to have a liberal heart.

## FATHER AND SON BANQUET

The annual father and son banquet of the senior church Tuxis and Trail Ranger Squares was held on Tuesday evening at the Union church. Banquet was served at six o'clock, the catering being in the hands of a number of capable ladies. Some 110 boys and dads sat down to well-supplied tables provided by the mothers of the lads. After supper, Toastmaster Charlie Howe welcomed the guests of the evening, outlining the history and growth of the boys' work. He then called on Bill Randall to introduce the 'Lifeboat Tuxis Square to the gathering, which he did in a neat speech, after which the Tuxis group sang their group song.

Walter Lord was called on to introduce the Non-Skid Trail Ranger group. He briefly outlined their ambitions and his remarks were followed by the group song.

George Shearer introduced the Commutator Trail Ranger Group, a recently organized group. He told the audience that Trailranger four-fold ideals were the same to the boys as the commutator is to the Ford in the regulation of power. Following George's remarks, his group sang their song.

Then came the toast list. The toast to "The Dads" was ably proposed by Bob Barnhill and responded to by Messrs. S. Knapman and A. Hamilton.

The toast to "The Sunday School" was proposed by Roland Pinkney and responded to by Rev. W. T. Young.

The toast to "The Girls of the C. G. I. T." was proposed by T. Poggiali and responded to by Miss Flora Warner, president of the Excelsior C.G.I.T. group.

The toast to "The Church Board" was proposed by John Patterson and responded to by Mr. F. M. Pinkney, chairman of the board.

Mr. E. H. Putnam, who was sitting at the head of the table of the Junior Group, was then called on and was received enthusiastically by the boys and gave them some good sound "fatherly" advice.

Dave Kemp, junior, proposed a vote of thanks to the mothers for the splendid supper. This motion was seconded by Phil Christophers, junior. Then Mervin Evans sang "Mothers," to which Mrs. Farmer on behalf of the mothers replied.

The tables were cleared away and the boys and their dads engaged in games of group nature until 10 o'clock, when they sang "God Save The King," and dispersed.

The success of this affair speaks well for the organizations effected through the untiring energies of Rev. W. T. Young, pastor of the Union church. It is interesting to note that included in the membership of the different organizations and groups are represented many nationalities, and the interest manifested by the boys is sufficient proof of its popularity.

Poverty ought to be listed as a crime when work will prevent it. In the same sense, lack of work ought to be a crime when men willing and eager to work cannot find it.

Watch the mechanics elated upon the local rink in imaginary hockey. Ole Olson will be king defender of the hockey faithful and will be armor plated throughout to withstand the onslaughts usually suffered by a goal keeper. Part of his armament will consist of a Ford radiator charged by a force pump, and neatly mounted on Olson's breastplate. Other members of the team will be similarly protected, so that there will be no need of loved ones at home worrying over the safety of hubby while he is at the arena.

## Canada's Needs

No. 6—Scientific Research

In the course of the several articles which have appeared in this column under the above general heading, some of Canada's needs have been enumerated but only in the most general way. Any attempt to make a survey of the way and means of meeting and providing for these needs. Recently, however, a little pamphlet has been issued by the Honorary Advisory Council for Scientific and Industrial Research which merits the serious consideration of the Canadian people and is worthy of the widest possible circulation. It presents at least one very practical suggestion how some of the needs referred to, more particularly in the fourth article of this series, can be met. It is, therefore, proposed to quote at some length from the pamphlet in question which is entitled "Research and the Problems of Unemployment, Business Depression and National Finance in Canada."

"I am not a protectionist but I say this," declared a statesman now dead. "The variety of work carried on among the citizens of Canada should be as comprehensive as possible."

"Not because we are thus enabled to boast of the number of our trades—that would be mere vanity."

"Not merely because our country should be able to fill as many as possible of its own needs without having to ask foreign aid."

"Not merely because we should learn as soon as possible to finish the raw material with which Nature endowed us—rather than confess our helplessness by asking foreigners to finish them for us and giving them the wages and the profit on our raw materials."

"Not merely because our country should be as soon as possible escape from dependence for its prosperity on any one kind of production but should divide the risk among many."

"But because Canada should retain her most ambitious sons and daughters within her own boundaries by encouraging for their sakes that variety of occupation from engineering to farming—from chemistry to literature—which they want the highest awards and honors, they are still compelled now days to seek abroad."

One of the serious drains on the strength of the Dominion of Canada is the annual loss of engineers, chemists, scientific farmers and technical experts—whose training paid for by Canadians in Canadian schools and universities supported by Canadian public money, thus goes out to make foreign countries rich and place Canada further in their debt for foreign goods and services.

Monopolies of knowledge—that is, monopolies of special branches of technical knowledge—constitute one of the most powerful weapons of trade today.

Secret agreements, combines, trusts and the ordinary method of "conspiracies in the restraint of trade," become very mild and impotent weapons when compared to such formidable instruments as, for example, a secret chemical formula that might be scribbled on the back of a calling card.

In the bloodless wars for international trade it is the armies of chemists and engineers that must be mobilized, drilled and directed against the parasites of unknown scientific facts. Expert chemists, expert engineers, intelligent departments, pervasive salesmanship and even the magic of a great fraud, cannot win or cannot hold, for long, trade for a country whose producers are not armed with scientific knowledge of their work.

A great camera manufacturing concern in the United States is able to dominate its field in at least half the world because it knows more scientific secrets of that trade than anyone else. Because if a new concern started in opposition, it need only reach into its pigeon holes for some new formula—not otherwise convenient to exploit at present—by which to raise its product one step beyond the competition of the world to be rival.

So in steel-making! So in the manufacture of electrical apparatus! So in textiles! So in chemistry! So in agriculture! So in every important branch of human industry!

So in Canada—as compared to other nations—everyone of our industries is threatened, and must ultimately fall under the thrall of foreign domination unless it keeps pace with the advances in technical knowledge.

So, unless we master all this to be known regarding the nature and possibilities of our raw supplies of varied raw materials, Canadians must ultimately find themselves at the mercy of foreigners who know how to prepare our riches for purposes of commerce.

Fifty concerns in the United States retain research departments at costs ranging from \$25,000 to \$2,000,000 a year. In England, France and Germany, the race for technical knowledge for purposes of trade gathers speed. The mere digger-out of raw materials gets the pay of a laborer. The nation that can finish its raw materials trades and quadruples its revenue.

The question is—Shall Canada keep reasonably in pace with the modern movement? Shall Canada add to her natural possessions a superior knowledge of how to use them?

Can the needed variety of occupations for ambitious Canadian sons and daughters be maintained unless she does make places for such knowledge and encourage those who critical it?

Can the legions of Canadian taxation and the evils of unemployment be offset if Canada, in her struggle for markets and for good returns on her wares, does not possess herself of the instrument of technical knowledge?

(To be continued)

## Relic of Babylonian Times

Interesting Discovery Recently Made

The ruins of a Babylonian colony dating back 2,400 years before the Christian era, have been discovered at Kuba, N.Y. in Asia Minor. The remains discovered prove that the community which lived there was partly military and partly commercial.

Considerable inscriptions give many curious details of the organization of the city, which was governed by a prince and a female priest, whose post, we are told, had been previously occupied by those of their male citizens.

## Icebreakers Sent to Russia

British Cruisers Will Endeavor to Keep Port Open

Two huge ice-breaking cruisers, the Alexander Nevsky and the Strelagol, have just been sent to Petrograd by British naval authorities to keep that Russian port open this winter, if possible.

They were built for Russia in the world war and were used by the army at Archangel and in the White Sea. During the occupation of the Archangel district by American and other allied troops.

It is said that their names will be changed to Lenine and Trotsky. They are among the largest ice-breakers in the world and are so constructed as to break the ice around them by rolling as well as by pushing through the ice ahead of them.

T-15.

## THE ORIGIN OF GALL STONES

They are simply dried bile made up of crystalline constituents of that fluid. Very common in this disease among merchants, clerical men, shop girls, and those of sedentary habits. Prevention consists in maintaining correct action of the liver and bowels, and this is speedily accomplished by using Dr. Hamilton's Pills. No person using Dr. Hamilton's Pills will be subject to bilious fits. Sound digestion, good appetite, a clear complexion, evidence the health giving properties of Dr. Hamilton's Pills which are not only best for general family use. When a laxative is needed, when you feel out of sorts, that's the time to use Dr. Hamilton's Pills of Gall Stones. Buttermilk. 25c all dealers or The Carruthers Co., Montreal.

## The Common Work

The best things are nearest; breath in your nostrils, light in your eyes, flowers at your feet, duties at your hand, the path of God just before you; then do not grasp at the stars, but do life's plain, common work as it comes; certain that daily duties and daily bread are the sweetest things of life. Again.

## WINTER WEATHER HARD ON LITTLE ONES

Our Canadian winters are exceedingly hard on the health of little ones. The weather is often so severe that the mother cannot take the little ones out for an airing. The consequence is that baby is confined to overheated and badly ventilated rooms; takes cold and becomes cross and peevish. Baby's own father and mother should keep the little ones healthy. They are a mild laxative which regulate the stomach and bowels and prevent colds. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

In preparing kids for gloves, one London firm uses several thousand eggs a week.

Mr. Miller's Worm Powders needed the support of celebrities and he got it from mothers who know the great virtue of this excellent medicine. But the powder will speak for itself and in a way that there can be no question of them. They act speedily and thoroughly, and the child to whom they are administered will show improvement from the first dose.

The city of Muskegon, Mich., has loaned \$10,000 without security, to those of its citizens who are out of work and in need.

## RUN-DOWN, NERVOUS? Weak—You Need the Help They Need

St. Thomas, Ont. Dr. Pierce's Favorite Prescription.

"I have not only taken it myself but I have recommended it to many of my friends who are run-down, or who suffer with nervousness. I have known of it to do more good than any other medicine I have used, and in no case have I ever heard one word of complaint against Dr. Pierce's Favorite Prescription, but always praise." Mrs. Sarah Burton, 118 South St.

The use of Dr. Pierce's Favorite Prescription makes women happy by making them healthy. A great many women in every part of Canada who are the best of health today to this famous Prescription.

HAVE YOU STOMACH TROUBLES? This Weak Headache Great Indigestion and Gout Has Experienced.

Dundalk, Ont. "I am only too glad to tell you of Dr. Pierce's Golden Medical Discovery has done for me. I doctored three months and got no relief but thanks to Dr. Pierce's medicine, I found a cure at last. I will recommend it to any poor sufferer with indigestion, headache, or any other ailment. When I started taking the 'Discovery' I weighed 150 pounds; now I weigh 115. No other medicine has done for me as much as Dr. Pierce's Golden Medical Discovery in tablets." Mrs. Mabel McFarlane.

You can quickly put yourself in a condition by using Dr. Pierce's Golden Medical Discovery in tablets. Dr. Pierce's Golden Medical Discovery in tablets is sold by all druggists or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont. or trial size and write for free medical advice.

Make it your handy household assistant. Use it for making soap, in washing dishes, for cleaning sinks, refrigerators, garbage cans, etc., for cleaning clogged drain pipes, for removing grease and smoke stains, for scrubbing floors and tiling. You will find that the systematic use of Gillett's Lye will keep everything around the kitchen and bath room clean, sweet and wholesome. Cleans and disinfects. Is economical and sure in its effects. Has been the standard for over 50 years. It saves labor, time and trouble.

Made in Canada

## A Whale Story

Passengers See Liner Cut Big Whale in Two

The story of a 75-foot whale, which was neatly cleaved in two by the prow of the Italian liner Presidente Wilson, was related by passengers when the vessel docked in New York. The President Wilson was sailing in mid-Atlantic when the whale was sighted lying directly across the bow of the vessel. A hundred and fifty passengers lined the rails to see what would happen.

Passenger along the port rail heard a crash as the bow struck the huge mammal, saw the water turn pink and saw the head of the whale tail astern. Those on the starboard rail experienced the same sensation—only they saw the tail flail astern.

Women and Asthma. Women are numbered among the sufferers from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. J. J. Kellogg's Asthma Remedy has brought new hope and life to many such. Testimonials, sent entirely without solicitation, show the benefit it has wrought among women everywhere.

## Wireless Conference

Appointment of Canadians is Now Deferred

The appointment of Canadian representatives to a technical conference on inter-imperial wireless stations probably will not be made immediately. It is understood, owing to the number of other pressing matters the government has on hand. The report of the wireless telegraph commission recommended Canadian representatives be named for such a conference. Canada is expected to go ahead with its share of the proposals eventually.

One of the reasons for delaying action on the recommendation is understood to lie in the proposed amalgamation of the naval department with militia and other departments of defense under one minister.

Plans for the amalgamation of the defense departments are expected to be completed in time to introduce a measure in the next parliament.

For Cataract—It is one of the chief recommendations of Dr. Thomas' Eye Lotion. Oil that it can be used internally with as much success as it can externally. Sufferers from cataract will find that the Oil when used according to directions will give prompt relief. Many sufferers from cataract have found relief in the Oil and have sent testimonials.

## Golf At Pacific Coast

Game is Played Every Day in the Year At Victoria

There are no better known golf courses in the Dominion than those at Victoria on Vancouver Island, no doubt due to the fact that the game is played every day in the year.

One of the delights of the winter visit to the Coast is to enjoy again the favored summer sport. It will, therefore, come as a pleasant surprise to know that the Canadian Pacific Railway has completed arrangements whereby guests of the Empress Hotel at Victoria will be accorded playing privileges on the excellent 18-hole Cowfold Course.

Germany's 1921 Crop

The official German crop report gives the following production figures for 1921: Rye and wheat, 2,529,547 tons; barley, 1,525,595 tons; oats, 5,444,582 tons; potatoes, 26,151,250 tons. Of this production the government's share is 2,500,000 tons, but only 70 percent has been delivered, the report says.

To Cross Niagara Falls On A Wire

James E. Hardy, a native and resident of Toronto, who crossed the 260-gate river near the falls on a wire twice in July, 1920, is going to try the feat again this summer, he announced. Mr. Hardy is 46 years of age.

During the courtship a young man is never out of danger until the girl says "No" three times.

Minn's Lintment for Chaps

## Shortage of Oil

Says the U.S. Has Oil For Only Twenty Years

A canvass of the oil reserves of the country has convinced the United States Geological Survey that the available supply is only 9,500,000,000 barrels. This is enough to satisfy the present requirements of the country for only twenty years, provided the oil can be taken out of the ground as fast as it is wanted.

The experts of the survey estimate, however, that the oil cannot all be discovered, much less taken out, inside of twenty years, and assert that the time is rapidly approaching when

## The Joy of Living.

When you wake up with no appetite, a dread of the day's work and your head heavy, your digestive organs are probably calling for just the help which Mother Seig's Syrup can give them. The medicinal extracts of more than ten different roots, barks and leaves restore the natural healthy action of liver and stomach. Meals are enjoyed, that tired feeling disappears, and you know the joy of living. Sold in 50c. and \$1.00 bottles at drug stores.

10-261

## CORN

Lift Off with Fingers

Doesn't hurt a bit! Drop a little "Prestone" on an itching corn, instantly it comes off. No more hurting. Then shortly you'll lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Prestone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

## CASCARETS 10¢

For Constipated Bowels, Sick Headache, Sour Stomach, Bilious Liver

The nicest cathartic-laxative in the world to physic your liver and bowels, when you have Dizzy Headache, Cold, Biliousness, Indigestion, or Upset, Acid Stomach is candy-like "Cascarets." One or two tonight will empty your bowels completely by morning, and you will feel splendid. "They work while you sleep." Cascarets never stir you up or grip the Salts, Pills, Calomel or Oil and they cost only ten cents a box. Children love Cascarets too.

WARNING! Say "Bayer" when you buy Aspirin. Unless you see the name "Bayer" on tablets, you are not getting Aspirin at all. Why take chances?

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism  
Toothache Neuralgia Neuritis  
Earache Lumbago Pain, Pain

Ready Relief! Boxes of 25 tablets—Also bottles of 25 and 100—Druggists. Aspirin is the trade mark registered in Canada and other countries. While it is well known that Aspirin means Bayer, the public must be cautioned that the name "Aspirin" is used by many other manufacturers. Tablets of Bayer Company will be stamped with their special trade mark, the "Bayer Cross."

## Date Is Set For The Opening Of Dominion Parliament

Ottawa—Parliament will be summoned to meet on Wednesday, March 5, it was announced following a meeting of the cabinet council. The first day's business will be limited to the election of a speaker, while the formal opening, with the delivery of the speech from the throne, will take place on Thursday, the following day.

The choice of Wednesday and Thursday as the opening days of the session is understood to have been made because of the fact that there are so many new members coming into the House this year. A very large number will be situated in the new buildings, and it was felt that by meeting on Wednesday and adjourning probably Thursday night until the following Monday before the debate on the address in reply to the speech from the throne is begun, these new members would be given a chance to get settled in quarters and also to become acquainted with their fellow members. Monday, two days earlier, had been favored for some of the members of the cabinet at the opening day.

The names of the mover and seconder of the address have not yet been announced. The new speaker of the Commons will be Hon. J. B. Macdonald, member for Cape Breton. The new speaker of the Senate will be Hon. J. B. Macdonald. It is understood that the selection has been made for that position yet.

### The Saskatchewan Budget

Strict Economy Will Be Practiced To Keep Down Taxation

Regina—Strict economy will be practiced in the departmental and other activities of the Saskatchewan Government during the coming fiscal year, it was announced by Hon. Chas. L. Dunning, provincial treasurer, in his budget speech in the Saskatchewan Assembly. "We have cut the estimates to the bone," said Mr. Dunning.

Estimates which were referred to the committee of supply at the close of the speech will be reduced \$1,000 in the revenue expenditure for the coming year as compared with the amount expended in the preceding fiscal year. The estimates call for a total expenditure during the year ending April 30, 1924, of \$21,492,200, of which \$12,175,219 represents revenue.

Despite the difficulties which the government has encountered in the collection of taxes during the past year due to economic conditions, resulting in arrears of considerably over \$2,000,000, the government, Mr. Dunning announced, had no desire and did not propose to provide for any increase in taxation. These taxes will automatically be collected, and it is proposed in the meantime to make use of some of the surplus left over from a year ago. The surplus of \$1,000,000 at the end of the fiscal year 1919-20 had shrunk to \$1,500,000, including stock at the end of the fiscal year 1920-21, and under present conditions this surplus was referred to by the Provincial Treasurer as one of the most valuable assets the government has.

Of the total expenditure provided in the estimates an amount of \$1,000,000 is provided for capital account and the remaining \$2,418,000 is divided under two headings as follows: Expenditure from telephone revenue, \$2,500,000; expenditure under the Agriculture Aid Act, \$218,000.

## Will Limit Navies And Restrict Use Of Gas And Submarines

Washington—The Washington negotiations for limitation of armament reached their consummation when a plenary session of the Arms Conference gave definite and public approval to the two treaties limiting navies and restricting the use of new agencies of warfare.

One of the covenants thus sealed after eleven weeks of debate establishes a fixed ratio of capital ship strength between the great powers and the other plotters; them against unrestricted submarine warfare and use of poison gas. Within a day or two the plenipotentiaries of

### Conference Will Give World Eight Treaties

Washington—Unless present plans are changed, the Washington conference will give to the world eight treaties, to seven of which the United States will be a party.

Four-power Pacific treaty, signed on Dec. 13.

Five-power naval limitation treaty, ready for signature.

Five-power submarine and poison gas treaty, ready for signature.

Six-power treaty allocating German Pacific cables, drafting.

Nine-power treaty on Chinese tariff, drafting.

Nine-power treaty on other Chinese questions, drafting.

American-Japanese treaty, regarding Yap, virtually ready for signature.

Chinese-Japanese treaty regarding Shanghai, near completion.

### HALIFAX EXPLOSION WRECKED HER NERVES

The reader will, no doubt, remember when a few years ago there was a collision in the Halifax N.S. harbor and one of the municipal ships was wrecked up, causing great loss of life and leaving a large portion of the city in ruins, and causing a great deal of suffering and distress among the inhabitants.

"She wrecked my nerves," said Mrs. Winifred Hill, now of Windsor, N.S., who was at the time of the explosion and the wrecked ship was in the harbor at that time and went through this trying experience and the shock wrecked her nerves.

"I saw Milburn's Heart and Nerve Pills advertised, so I took two boxes, and the helped me so much I took more, and now I am completely relieved. I can't recommend them to any one suffering from heart and nerve trouble."

To all those who suffer from nervous shock we would recommend these.

**MILBURN'S HEART AND NERVE PILLS**

As they are known to line up all the nervous system and strengthen the weakened organs. Milburn's Heart and Nerve Pills are the original heart and nerve food having been on the market for the past 27 years. Price, 50c. per box at all dealers, or mailed direct on receipt of price. The T. Milburn Co., Limited, Toronto, Ont.

### Wheat Consigned to Orient

First Shipment From Saskatoon District Made in January

Saskatoon—One hundred and fifty thousand bushels of wheat grown in the Saskatoon district were shipped to Shanghai and Yokohama during January direct from the Canadian Government elevators here by the McMillan Grain Company, according to E. R. Clarke, western manager of this company.

This is the first consignment of the kind for Asiatic points to have been shipped direct from Saskatoon. At the present time, according to Mr. Clarke, there are only minor facilities at Vancouver for handling grain, but several grain companies are now considering extensions at this point.

Belin.—Two French soldiers were killed and twenty-five were wounded in the disorders at Petersburg, Silesia, according to the latest reports from Gletwitz. Shots were exchanged while the soldiers were searching houses for arms.

The United States, Great Britain, Japan, France and Italy will formally fix their signatures.

At the same session the Far Eastern wing of the conference moved forward toward completion of its tasks by announcing officially the terms of the Shanghai settlement and by giving final approval to nine of the resolutions adopted in committee in regard to Chinese problems. The agreement on Shanghai already has been put into a draft treaty between Japan and China and the other Far Eastern settlements are to be embodied in at least two general conventions which will come before the conference shortly.

### Saskatchewan School Trustees Association

Interesting Programme for This Year's Convention at Regina

Regina.—The School Trustees Association which will be held this year in the Metropolitan Methodist Church, Regina, on February 22 to 24, promises to be the most memorable in the history of the association. This is one of the largest annual conventions in Canada and a record number are registering this year, particularly from the districts where it is impossible to get the taxes collected to keep the schools open. "An effort is being made this year to formulate a scheme and have it adopted by the government under which there will be a tax equalization fund out of which the poorer districts will be assisted by the province as a whole. It is felt, by many that the amount to these districts should be larger than in the well-to-do districts. An interesting discussion will take place and the districts will be well represented.

Many districts desire to have the questions of teachers' salaries re-opened as they feel they are paying too much. The Teachers' Alliance think that conditions are not satisfactory from the teachers' standpoint and the secretary of the alliance has given permission to address the convention.

Among the other important questions for consideration will be that of assessing all the lands that are not in any organized school district for school purposes, the funds so received to be used in assisting the weaker school districts to carry on.

Another important matter before the convention is the question of the municipal school board and the whole question will be presented by Dr. J. A. Patrick of Victoria, under the heading of "The County System for Saskatchewan."

Among the prominent guest speakers the following have been announced: "Hon. Sam Datta, minister of education; George M. Wolf, M.A. D. Paed.; J. D. Denny, B.A.; Robert Englund, M.A.; M.C.; W. E. Stevenson, M.A.; Prof. R. A. Wilson, M.A.; Prof. J. M. Brown; W. M. Morris, of Toronto; James J. H. Scott, Perth, Ont.; A. W. Cooke, B.Sc.

The following speakers will deliver inspirational addresses, particularly after evening sessions: "Taylor Station, Toronto; C. W. Gordon, B.A. D.D. (Halifax County); Prof. W. T. Allison, M.A.; Prof. W. E. Osborne, M.A. and Rev. Canon Davidson.

Stenographic views and moving pictures will be shown during each of the sessions. The Bryant public speaking contest will be held on Friday evening. Music will be furnished by the Regina Collegiate orchestra; the Boy Scouts Band; Prof. Kilmer; the organ; by Miss Alice Galt, teacher of singing at Regina Conservatory of Music; by Miss McCracken, violinist; by J. H. Arnett and Sons; and by the Metropolitan Methodist choir, Regina.

Arrangements have been made by the railway for convention rates on the local scale. All fares will be pooled. In addition to the delegates, many visitors will be in attendance from the different parts of the province. The Regina Board of Trade is making provision for 2,000 delegates.

### Will Bury Shackleton At Antarctic Gateway

Lady Shackleton Believes Explorer Would Have Wanted This

London.—The body of Sir Ernest Shackleton, which is now at Montevideo Uruguay, will be taken back to South Georgia Island, to be buried there, according to the Daily Mail. This decision, the Mail attributes to Lady Shackleton's desire to what she believes would have been the explorer's wishes.

Shackleton left no instructions respecting his burial, but relatives and friends, the Mail says, feel that it would accord with his desire to be laid to rest at the gateway to the Antarctic.

Shackleton's grave, therefore, will probably be beside the English Church at Grytviken.

### Wretchedness OF Constipation

"Foreign nations will never own China. The country is too big, too potentially powerful, too intelligent. It holds too many brilliant men and women for the nation to remain under foreign domination."

### Mothers Open Child's Bowels With California Fig Syrup

Your little one will love the "Fruit Taste of California Fig Syrup" even if constipated, bilious, irritable, feverish, or full of cold. At teatime, give a little to cleanse the liver and bowels in a few hours you can see the improvement. Thoroughly it works all the way down, and undigested food out of the bowels and gives her a well, playful child again.

"Millions of mothers keep 'California Fig Syrup' handy—they know a teaspoonful tonight saves a sick child tomorrow. Ask your druggist for genuine 'California Fig Syrup' which has directions for babies and children of all ages printed on bottle. Mother! You must say 'California' or you may get an imitation fig syrup."

### Attempt to Murder President of Fiume

Two Wounded By Bomb Thrown At Motor

Fiume.—An attempt was made on the life of President Zanella of the independent state of Fiume as he was leaving his hotel in a motor car. A bomb was thrown at the machine but the president was not injured. A member of the chamber of deputies and a police officer were wounded by the explosion.

Prof. Riccardo Zanella, was one of the leading opponents of Gabriele d'Annunzio while the latter was in Fiume. He occupied the Fiume city hall by a coup d'etat in April of last year and was elected president of the Independent State by the constituent assembly on Oct. 6.

### Want Potato Growers' Exchange

Winnipeg Gardeners Complain of the Burden of Taxation

Winnipeg.—Formation of a potato growers' exchange, similar to the one in operation in Minnesota, was considered by the Horticultural and Forestry Association of Manitoba in an annual convention. Figures given by F. W. Almy showed the 1921 potato yield to have been 5,550,000 bushels, as against 2,419,000 bushels the previous year.

A. Asmott, manager of the Minnesota Potato Growers' Exchange, told the convention that the exchange was handling about 100 per cent. of the Minnesota crop, but was hopeful that it would soon be handling the entire output.

The hundreds of acres of flourishing gardens around Winnipeg will be a wilderness in a few years unless the heavy taxation burden is relieved, declared H. W. Whellans, Winnipeg. In many cases, gardeners, he said, were paying \$52 an acre in taxes.

Prepare Regulations

Ottawa.—Regulations for the control of the importation of Chinese eggs, now being compiled by officials of the department of agriculture, will be presented for approval of cabinet council almost immediately.

It pays to patronize home industry. Buy from the merchants in your own town.

## Think R. N. W. M. P. Should Be Used For Western Canada Only

### New Record For Vancouver Port

Largest Number of Ships Called During January

Vancouver.—Fifty-three ships, not including the big vessels that ply between Vancouver and San Francisco, entered and departed at the port during January.

This is a new mark for Vancouver and it is expected that the end of the year will see the total ship arrivals and departures exceeding any preceding year. In November, 1919, fifty ships called and departed, but these included many oil freight and passenger ships, and foreign ports which now are classed as coastwise.

Last year, to the end of December, 289 ships arrived here compared with 253 vessels during the preceding 12 months.

### Says Shoe Industry Nearly All Canadian

Investigation Shows People Are Buying Home-Made Goods

Montreal.—There is one thing about the boot and shoe industry of Canada that should be of great satisfaction to Canadians, said F. H. Poirer, sales director of the commercial intelligence section of the Ottawa Board of Trade, at addressing the third annual meeting of the Canadian Shoe Manufacturers' Association here, "and that is it is almost entirely Canadian."

"Mr. Poirer said that as a result of the recent investigations it had been ascertained that 90 per cent. of shoes handled in this country were of Canadian origin, as low as 50 per cent. twenty years ago."

It was declared that the headquarters of the association should be in Montreal and not in Toronto.

Packages Stolen From Express Offices

Victoria.—Two packages each, containing \$500 in \$2 bills were stolen from the Dominion Express Company's offices at the Canadian Pacific wharf, according to a report made to the police. The \$1,000 shipment was consigned to the Bank of Montreal at the Nelson and Enderby branches.

### Population Of Russia Decreased By Millions

Belshewski Press Report Statement Made By Commerce Department

Washington.—A decrease of about 10,000,000 in the population of Soviet Russia has been estimated with great accuracy, it is reported by the Belshewski press according to a statement issued by the commerce department. In 1921, the statement said, the population of Soviet Russia was placed at 225,000,000 by a Belshewski census. Earlier estimates of the territories included in present-day Soviet Russia, the statement declared, give a total of 145,000,000 as of Jan. 1, 1915.

### STATEMENT OF ALBERTA GOVERNMENT ON IMMIGRATION POLICY.

There should be no encouragement of wholesale immigration into Alberta from anywhere, until economic conditions in the province and in the west have been so adjusted in respect to freight rates, marketing, and natural resources that there will be a reasonable prospect of prosperity confronting the immigrant.

This is the policy of the Alberta Government with respect to immigration as outlined in a statement made by Premier Greenfield on his return from a joint conference with members of the sister Prairie Provinces in which the matter of immigration was discussed.

Premier Greenfield, however, believes that there should be preparatory work against the time when the tide turns, and the settler can come into the province with some assurance of success and without the necessity of battling with difficulties which have beset the path of the western farmer in the past few years.

The Premier also thinks that encouragement should be given good farmers from Great Britain or the United States or elsewhere, with certain financial resources, to establish themselves here at the present low costs.

Mr. Greenfield is emphatic, however, in the declaration that there should be no wholesale encouragement of settlement, no wide open door policy, until there is a readjustment of economic conditions.

These problems of readjustment are being tackled vigorously by the Alberta Government. On the question of freight rates, Premier Greenfield has already come to an understanding with the governments of the other Prairie Provinces that there should be a joint action towards securing a readjustment of these rates.

The question of better marketing has already received the attention of Hon. George Hoadley, the minister of agriculture. He has plans in this respect which will seek to improve the conditions under which the Alberta farmer is marketing his produce.

More outstanding, however, are the efforts to impress upon the farmers the value of giving more attention to the production of stuff for which there is already, and always will be, a ready market. Involved in this also is the solution of the southern Alberta problem, and the breaking up of the very large farming areas into smaller farms which can be operated with much less outlay, and considerable more profit in the way of mixed farming.

The question of the return of the natural resources to the province, is one which Premier Greenfield is confident will come to a satisfactory solution shortly. He hopes to be able to take this question up with the new government in Ottawa in the near future.

All these questions are receiving the close attention of the government with the aim of making the lot of the farmer in this province a happy and contented one, and by the same token increasing the general prosperity of the province.

The coronation of the new pope will take place on February the 12th—Sunday next.

The death of Mrs. Virtue, wife of A. G. Virtue, barrister and sister of John Torrance, of the Lethbridge Herald, died at Lethbridge yesterday morning.

### RISKING LIVES TO DISCOVER SECRETS

If the full history of secret processes could be written it would surely be one of the most romantic and fascinating books the world has ever seen and one of the most interesting sections of it would be that which dealt with the many attempts to steal the secrets from their jealous owners, says a writer in a London paper.

The secret of one of these stories is hid in the wild moorland country around Scenfield, where a watchmaker called Huntman, had built a factory for making steel by a process of his own invention.

The secret was a very valuable one, for it was the only process by which steel could be made of uniform quality throughout, but Huntman had little fear that any of his rivals would discover it for he employed only picked and sworn workmen, and the portals of his factory were almost as strictly guarded as the doors of a bank vault.

However, one bitterly cold wintry night when the wind was shrieking over the neighboring moor, driving the snow in wild eddies before it, a tattered and shivering tramp presented himself at the door of the works and pitifully craved permission to warm his frozen bones at the furnace fires. For a long time he pleaded in vain, the doorkeeper was obstinate; but finally importunity and the pathetic aspect of the man won the day and the tramp was admitted to the warmth, only to fling himself on the floor in utter exhaustion and fall asleep.

The tramp, however, was sleeping with one eye open, and with that eye he was craftily watching the men at their work, with the result that when, an hour later he left the place with words of gratitude he took Huntman's secret with him.

#### Down the Chimney

Another interesting story takes us to the neighborhood of Temple Bar, and to the shop of a chemist, who was the only man in England who knew the secret of the manufacture of citric acid. So jealous was he of his invention that he would share it with no one, but worked alone in the laboratory over his shop in Fleet Street.

One evening, however, when his processes were well advanced, he locked the laboratory and left the premises for a time, assured that no one could possibly gain admittance during his absence. But he bargained without a certain uninvited guest, who worked his way down the chimney into the laboratory and made such good use of his time, when he re-emerged from the chimney, he had the manufacture of citric acid at his finger's ends.

It was in a similar way that the manufacture of tinfole became possible in England—a secret which no one had been able to wrest from its owners in Holland for half a century. But there was a bold and crafty Cornishman, one James Sherman, who made up his mind to discover it at any cost, and going over to Holland he found his way into the factory at great personal risk and brought the secret back safely to England.

These are but a few of the romances of successful secret-stealing; and who shall tell the number of attempts that have failed, or even how many the attempting? Men will risk much to fathom such a secret as that of liquor made by the monks of the Grande Chartreuse, for which the sum of \$10,000,000 has been refused point-blank. But the secret has defied all discovery.

Among scores of secret processes, just as successfully guarded is that which has given to the world the exquisitely beautiful Dresden china. It is said that not even a king has been permitted to enter the guarded walls of the factory at Meissen, where the porcelain is made, with the solitary exception of the king of Saxony himself; and every workman is, under solemn oath, to which the severest penalties are attached, never to breathe a word of what goes on in the factory.

## Fruit And Vegetables Prepared By A New Method Of Evaporation

The New York Independent recently published an account of what is called a "Pocket Garden" taken to the Arctic sea. "When the MacMillan expedition packed up its goods and chattels a short time ago and departed for Baffin Land and the Frozen North on a voyage of scientific exploration, it carried along the first fresh fruits and vegetables ever to penetrate to that barren country," says The Independent. "Fresh spinach and green corn, new rhubarb in the stalk for rhubarb pies, and raw cabbage for salad were included. Can you imagine the scene? A midwinter dinner in the midst of ice-clocked fields and a group of fur-wrapped Eskimaux to wonder and comment on the strange delicacies of the white man's table! Fresh fruits and vegetables it has been pulled from the garden and eaten still fresh in a land where no vegetation of any sort is found? How is it accomplished? Every one of it has been wrapped up simply in paper bags and sealed away with no greater precautions than the blankets of other luggage. Yet sufficient food has been carried along in this form to last each member of the party five months."

According to The Independent, this "Pocket Garden" was made possible by a new process of dehydration, which gets rid of the water in fruits and vegetables without destroying the original flavor, so that by putting them in water for a few hours, they are restored to a condition of freshness. This process is designed not for dehydration on a large scale in factories, but for use on farms and in homes, so that the farmer, whether on the farm or in the town, can quickly and economically preserve fruits and vegetables for winter use.

Dehydrated fruit or evaporated fruit as it used to be called, has never been received very favorably by the public in the past, because processes were imperfect and the resulting products unsatisfactory. Recent discoveries by experts and the latest retooling apparatus have now removed all objections, and demonstrations have been given at which those in attendance were unable to distinguish between dishes prepared from the fresh and from the dehydrated and restored material.

If a domestic dehydrator capable of dispelling the water from fruits and vegetables without destroying the flavor or could be manufactured in Canada and sold at a price to bring it within the reach of every householder, it would considerably reduce the cost of living both by eliminating waste and by reducing the cost of preserving fruits and vegetables in the household. It would save the cost of glass jars and other necessaries, while the canned dehydrator could be safely kept in cardboard boxes such as are used for cereal foods or even in ordinary paper bags. However, any housekeeper who has glass jars and wishes to use them for the purpose of storing dehydrated food can put a much greater quantity of food in a jar than was possible when preserving food by old-fashioned canning methods.

According to a table prepared by Prof. Caldwell, Horticultural Investigation Branch, Department of Agriculture, Washington, D.C., hundred-pound lots of fresh fruits and vegetables reduce as follows upon dehydration, it differences in weights being due to the varying quantities of water in different kinds of fruits and vegetables:

Product	Pounds
Apples to .....	12 to 16
Apricots to .....	16 to 18
Blackberries to .....	16 to 20
Beans to .....	11 to 12
Beets to .....	14 to 17
Cabbage to .....	8 to 9
Carrots to .....	10 to 12
Cauliflower to .....	12 to 14
Celery to .....	6 to 7
Cherries (sweet) to .....	22 to 26
Corn (sweet) to .....	26 to 32
Loganberries to .....	17 to 22
Onions to .....	9 to 11
Parsnips to .....	20 to 22
Peaches to .....	13 to 16
Pears to .....	15 to 22
Peas (garden) to .....	22 to 25
Potatoes (white) to .....	22 to 25
Pumpkin to .....	6 to 8
Raspberries to .....	17 to 22
Squash to .....	6 to 10
Squash to .....	7 to 9
Tomatoes to .....	6 to 9
Turnips to .....	7 to 8

There has never in the past been a system of home drying that could compare favorably in convenience with what is known as "canning" in glass jars, but it is claimed that this difficulty has now been solved, and that food can be dried in the home more conveniently and economically than it can be "canned."

Who prefer their home preserved fruit to factory owned products, not

only because they take pride in their work, but also because they know exactly the condition of the fruits and vegetables at the time they are preserved, and although most of the canning factories exercise great care in the selection of fruits and vegetables, women will always have more confidence in their own selection and examination. A similar preference would no doubt be given to home-dehydrated food as compared with the factory product if it could be conveniently dried at home in such a way as to preserve the original flavor, and packed in attractive pasteboard containers properly labeled.

There exists at the present time a good deal of prejudice against dehydrated foods owing to the fact that in past methods of drying, either by hot air, or by long exposure to the sun and air, the outer cells of fruits, vegetables, meats and fish were destroyed and many of the essential oils and flavors escaped before the water was expelled from the inner cells. However, it is claimed that by a process which slightly moistens the dry air with steam, wonderful results have been achieved in the preservation of fruits, vegetables, meats and fish.

### Health of Dairy Cattle

Everything Depends Upon Proper Precautions Against Infection

The question has recently been raised as to whether the making of high production records is detrimental to the health of dairy cattle, and whether the risk of disease to pure-breds is sufficient to deter a man who attaches a high value upon the health of his herd from engaging in the pure-bred business. To the first question the Veterinary Director-General of the Dominion has replied that there is no doubt that intense feeding to stimulate excessive milk production has a tendency to lower the resistance of the body to attacks of infectious disease, but that if proper precautions are taken against danger of infection, there is no reason why record-making should interfere with maintenance of health. Without infection no disease of an infectious nature, such as tuberculosis, is possible. To the second question the Veterinary Director-General gives a decided negative. There he, says, if a man is willing to take the proper precautions, nothing to prevent him building up a herd of pure-bred dairy cattle as free from disease as any other. He points out that under the accredited herd system now in existence, the opportunities for doing this are a great deal better than they were in former years. Purchases can now be made from accredited herds with every confidence that the animals are absolutely free from tuberculosis.

### Immigration Figures

Many Farmers Enter Canada From United States

A total of 26,576 immigrants came to Canada in the eight months ended November 30, and by the time the fiscal year is ended it is estimated that the total will exceed 100,000. Of the former, 52,396 arrived at ocean ports and 23,776 from the United States. Those who came by water comprised 16,301 from the former class, 3,733 from the latter, 5,643 mechanics, 2,607 traders, 6,083 domestics and 613 miners.

The contingent from the United States comprised 10,404 of the former class, 2,963 labor, 1,234 mechanics, and 1,961 traders. The decrease compared with last year is 37 per cent.

In the period from 1900 to 1921, immigration totaled 3,517,211, of which 1,223,631 were from the British Isles; 1,366,508 from the United States; and 887,272 from other countries. Hindu and Japanese immigration has almost ceased.

German Toys Dumped in Britain  
Owing to complaints from British manufacturers that German toys are sold in Great Britain below prices at which similar goods can profitably be made in Britain, in consequence of the depreciation of German currency, the British board of trade has appointed a committee to consider the question of imposing on such toys a special duty under the provisions of the safeguarding of industries act.

### Wireless for Police

Chicago Officers Will Carry Small Phone Apparatus

Soon every policeman in Chicago will carry in his pocket a miniature wireless telephone. No matter, in what part of the country he is traveling, headquarters can communicate with him instantly. A policeman will be able to receive a message but can't send one. He can hold the telephone to his hand. It has a receiver, which he can place to his ear, and when properly tuned in with headquarters he can hear his message as distinctly as from a call box. The receiving antennae will be in the lining of the policeman's coat. While walking along the street the policeman will suddenly become aware of a little buzzing sound—the signal. He will place the receiver to his ear and get the message.

### Rheims to be Rebuilt

Work Will Not Require More Than Seven Years

The city of Rheims may be rebuilt within five years. This is the opinion of Marquis Melchior de Polignac, president of the Co-operative Society for the Reconstruction of Rheims. At the most, he says, the work will not require more than six or seven years. The amount of work remaining to be done is estimated by the Marquis to cost 1,000,000,000 francs, of which 100,000,000 for reparations and 900,000,000 for reconstruction. He says that the society will have 200,000,000 francs placed at its disposal each year for the next five years. This is by arrangement of credits with the Department of Public Works.

### Many Will Investigate Northern Oil District

Extent of Field Will be Determined During 1922

With more oil prospectors than ever before preparing to go into the northern country, the true nature and extent of the Fort Norman oil field will be fairly accurately determined during 1922, according to Willis J. West, Edmonton, manager of a transportation company operating a fleet of steamers on rivers in the far north. Steady development is what is most desired and there will be a steady stream of people into the new empire of the north next summer, but nothing in the nature of a rush is looked for by the people of the country, many of whom have already at this time, Mr. West stated.

The country is so vast as to be almost beyond the power of people who have never been there to visualize it. One of the ships operated by his company makes a journey 1,000 miles long every trip. Mr. West, while admitting it is cold to winter, declared it was not nearly so cold as some places of New York State nor as cold as the Cariboo country. Vegetables can be grown in all parts of this northern country; he says, potatoes of great size being raised as far north as Fort Good Hope, within 100 miles of the Arctic Circle.

### Canada Has Three Sugar Factories

At the present time there are three sugar factories operating in Canada, which manufacture from Canadian sugar beets, with annual production of 25,000,000 pounds. All of the factories are situated in Western Ontario.

## A Famous Sea Captain Late Commander of the "Empress of France."

The Canadian Pacific recently lost by death in England one of their popular sea captains when Captain Ebenezer Cook, R.N.R., late of the Canadian Pacific liner "Empress of France," passed away at his residence at Great Crosby.

After conveying Mr. A. J. Balfour and other prominent Peace Conference delegates across the Atlantic, Captain Cook was taken ill on arrival at Quebec. He was lying ill on the steamer on her return voyage, and when the steamer reached Liverpool he was removed by ambulance to his home, but too late to recover.

The late Captain Cook, who was 53 years of age, was a man of fine appearance, and possessed a most courteous and genial disposition. He was looked upon as one of the most capable commanders sailing from the Mersey, and he performed excellent service during the war years.

Captain Cook was born at Tappin, and joined the Allan Line in 1885 as fourth officer of the "Cochin." Within four years he was promoted to chief officer of the "Fuselin," and he became the Commander of the "Oranien" in 1907. On the commencement of the war the Admiralty placed him in command of the "Victorian," and later he was given the command of the "Albatross," at that time flagship to the 10th Cruiser Squadron of the North Atlantic.

Following the Armistice, the Canadian Pacific Company retained him as commander of the "Albatross," which liner, following her conversion from war service, was renamed the "Empress of France." Captain Cook has since sailed regularly on this liner, and he was very highly esteemed by ocean travellers, including such distinguished passengers on the "Empress of France" as the Duke and Duchess of Devonshire, Lord Dufferin (Governor-General of Canada),

### Late Captain Cook.

and the Rt Hon. Mr. A. J. Balfour. The high esteem in which the late Commander Ebenezer Cook was held manifested itself at the funeral which was attended by a large throng of mourners, colleagues and friends. The funeral service was held at St. Luke's Presbyterian Church, Great Crosby, the service being conducted by the Rev J. Vaughan, M.A., Vicar of Great Crosby. Captain Cook was a prominent member of the Masonic Brotherhood, being atached to Crosby Lodge 2714. At the funeral the Canadian Pacific Steamships Limited were represented by J. A. Martin, London Manager, who also represented Sir Thomas Plumer, general manager; Capt. J. V. Foster, Liverpool.

pool Steamships manager; W. J. Sargent, consulting engineer; Capt. Maxwell, marine surveyor; D. Hallan, chief catering superintendent; W. Davies, dock superintendent; Capt. H. Sargent, R.N.R.; A. G. Wilson, shipping master; T. McNeil, Liverpool general agent, C.P.R., who represented Sir George McLaren Brown, European general manager; R. A. Swain, passenger agent, C.P.R. A large number of the officers and staff of the "Empress of France" and "Empress of Britain" were present.

Many beautiful floral tributes were laid on the grave.

## Agricultural Education Is Carried To A Point Of Excellence In Canada

### Proud Hapburgs In Poor Circumstances

Have Tried In Various Ways to Improve Income

Scattered throughout Europe the members of the once proud house of Hapburg are all living in relatively poor circumstances, some of them in poverty.

Emperor Charles and ex-Empress Zita, who were sent to Funchal, Madeira, as "guests" of the allies, are supplementing their allowance by the sale of some of the family jewels. Archduke Eugene and Ferdinand have been permitted by the British Government to remain at Lucerne, it being found after an enquiry that they had nothing to do with Charles' ill-fated attempt at restoration. Archduke Max and Frederick are living with Archduke and Josephine in Bavaria; Albert resides with his mother, Isabella, at Budapest; Leopold Salvator is staying at a villa near Barcelona; Joseph Ferdinand and Henry Ferdinand have settled down in the lodge at Salzburg, and Archduchess Maria Annunziata lives alone in the chateau Valus in Liechtenstein.

Some of them have attempted to fatten their income by working, but with more or less indifferent success. Literature in the form of "Memoirs" from various members of the family has been presented to editors, but none of them has shown great enthusiasm to publish the books.

### The Dairy Industry

Production of Butter in Canada Increased in 1920

The average price per pound for butter throughout Canada in 1920 was 64.36 cents as compared with 54 cents in 1919. All provinces except Manitoba and Alberta showed an increased production. The production of creamery butter in 1920 was 11,691,718 lbs. at \$63.625.203, compared with 10,529,707 lbs. valued at \$56,371,985 in 1919.

The price of cheese did not vary much over the two years, averaging 26.20 cents in 1920 and 26.79 cents in 1919. The quantity of factory cheese produced in 1920 was 149,201,354 lbs. with a value of \$39,100,372. The only provinces which showed increased production were Nova Scotia and British Columbia.

The dairy products blue book for 1920, issued by the Dominion Bureau of Statistics, states further that there were 3,161 dairy factories operating throughout Canada in 1920, comprising 1,046 creameries, 1,683 cheese factories, 495 combined butter and cheese plants and 28 condenser plants. The number of cows which furnished milk to the factories was 1,718,999.

For the 12 months ended Dec. 31, 1920, the quantity of butter exported was 13,561,920 lbs.; of cheese, 142,767, 546 lbs.; of milk and cream prepared, 52,038,752 lbs.; of fresh milk, 1,682, 877 gallons; of fresh cream, 1,576, 973 gallons. The total value of export dairy products for the year, \$38,346,023.

During 1920 the total quantity of butter imported amounted to 1,024,626 lbs., and of cheese, 479,234 lbs.

### Russians Organize Coal Trust

Properties Formerly Operated by English, French and Belgian Companies

Three of the largest coal and iron properties in the Donets Basin have been organized into a trust by a Russian company which has received a concession from the government and been promised a loan of 25,000,000 gold rubles, or their equivalent. This company is called the South Russian Steel Company.

These companies were formerly operated by English, Belgian and French companies and formed the heart of the Ukrainian industry.

Seekers After Grace  
Wife—"Did you notice the 'chinchilla coat on the woman sitting in front of this morning?'"  
Husband—"Er—no. I afraid I was doing most of the time."

Wife—"Um. A lot of good the service did you?"—Chicago Tribune.

Measles Schools  
Thirteen movable schools form part of the equipment for agricultural extension work in Bulgaria. Each school has a trained staff, and the courses cover anywhere from a week to a month. The total attendance last year was 35,000.

The Real Want  
"Russia want economic conference"—headline. Also the leg of a chicken, or anything else that will fill—Ottawa Journal.

The finest point of the standing of agricultural education in Canada and the role of the agricultural colleges of the Dominion was given at the Chicago International Livestock Exposition when the Ontario Agricultural College of Guelph, the Manitoba Agricultural College of Winnipeg, and the colonial Agricultural College of Quebec covered themselves with glory in the judging contest, winning the first prize in individual standing as well as other awards.

R. W. Walsh, a member of the quietest representation of the province of Ontario, with a score of 821 out of a possible 1,000, secured the premier judging honors. R. E. Wills, of the same college, finished fifth with a score of 861, and G. E. Rathby, also of Ontario, was sixth in the standing with a mark of 831. In the contest for aggregate college honors, the Ontario team was just nosed out by that from Ohio. A survey of the history of the college, however, reveals the fact that this honor has already on a previous occasion fallen to its representative.

The great merit of these achievements will be appreciated when it is considered what a small percentage of the total Canadian student body is represented in comparison with the numbers from all the States of the Union. It is concrete proof of the superlative quality of Canadian agricultural education and reflects in the most optimistic manner upon the Dominion's first pursuit of farming. This expedition, with its competitors which are comprehensive and exhaustive, is regarded in Canada no less than the United States as the criterion of agricultural education. At the apex of training comes the agricultural college, but all possible is effected in the line of education to prepare the farm child for his great destiny and in training him to become the most efficient agriculturist. At the apex of training comes the agricultural college.

Educational matters being under the jurisdiction of the various provinces, agricultural scholarship comes under the jurisdiction of the agricultural colleges are instituted and partially supported by the provincial governments. The Agricultural Instruction Act, of 1913, provided for the payment to the provinces of the sum of ten million dollars in a period of ten years for the purpose of aiding and advancing the farming industry of Canada. It was intended to supplement provincial appropriations and with a view to enabling the provinces to finance and develop the agricultural industry in the interest of agriculture in a more extended and comprehensive manner than would otherwise be possible—to promote better farming methods and encourage agricultural education.

Agriculture is a science that found all over the Dominion, serving the peculiar needs of the farmers of every section. Alberta possesses the Alberta Agricultural College as part of the provincial university at Edmonton as well as six agricultural schools in various parts of the province. British Columbia has an agricultural faculty at its university, as has Saskatchewan. Manitoba Agricultural College at Winnipeg has a creditable reputation for itself and is open to any student irrespective of previous education. New Brunswick has two agricultural colleges and Nova Scotia one establishment. Ontario has the Agricultural College at Guelph with more than a thousand students and two other establishments. MacDonald College, near Montreal, with nearly eight hundred students, is supplemented in Quebec with colleges at Ste. Anne de la Pocatiere and La Trappe. Oka, both affiliated with Laval University.

Agricultural colleges in Canada have been so instituted and arranged that the best possible agricultural education is within reach of any boy or girl or youth aspiring to the pursuit of scientific farming. To meet the needs of the people of the farm who find it impossible to get away to take the longer courses, short, intensive instruction courses are given in the winter months.

Then in the fall even so some may not be reached, the college goes to the farmer, and by means of specially equipped trains travelling through the country, a demonstration and instructional course to the farmer's door.

Thematism in a common complaint among dogs.

# Sport News of Local Interest

## THIRD ANNUAL ICE CREAM VENTURE OF THE SCRIBES AND PHARISEES

Scene of action: The ice palace of the Blainmore Arena.  
Date of Conflict: February 7, 1934.  
A.O. Time: 2 hours after Sunset.

**Line-up:**  
Scribes Position Pharooses  
Morgan, G. Goal Evans, N.  
Green, R. defense Castick, E.  
McPhail, J. Radford, J.  
Cingdon, M. H. Irving Ritchie, C. R.  
Chappell, W. H. Centre Paigett, F.  
Hamilton, M. Sub. Thorpe, C.  
McAndrew, J. Field, M.

**First Period**  
The game started with a great deal of close checking in centre ice, each team looking for an opening. The players all being old hands at the game seemed to be sizing up the checks and in numerous cases taking the comfortable position of sitting, down to let Castick try out the Scribes' goalie with a fast shot, but it was easily handled by friend Morgan. McPhail seemed to delight in cracking the boards at the other end of the arena with his bullet shots. Chappell, the wizard centre, of the Scribes drew first blood after five minutes play, putting the puck past Evans from a scrimmage in front of the Pharooses' goal. Both teams used subs at this stage. Robert made a few of his spectacular rushes call to be met by Green and McPhail, who easily won him down the chute. After a few minutes the tide of the game was kept busy warming players to use their skates instead of other parts of their anatomy to skate on. The period ended very fast with the score 1-1.

**Second Period**  
Fast combat on featured the shift. After two minutes Cingdon scored on a rebound. Green was making some fine rushes only to lose the little rubber at the nine month. Ritchie was going fast for the Pharooses, but all his shots were easily handled by Goalie Morgan. Good shots, but no COAL BUMP. Paigett, the mid get of the Pharooses and McPhail, Golaish of the Scribes, met in loving embrace; cast McPhail, wounded on the nose. Mac saved the goal anyway. After a pretty piece of combination, Bennett put the rubber past Evans, for the last goal of the period. McAndrew, who took McPhail's place amidst the crowd with his one-handed rushes. Score at the end of this period, Scribes 3, Pharooses 1.

**Third Period**  
Hamilton opened this shift by scoring after two minutes play. Thompson, the dark horse of the Pharooses, was playing an illuminating game. He was rewarded a few minutes later by a wrong a beautiful goal. The Pharooses goalie seemed to be spending most of his time in prayer. (His knees must be sore.) Cingdon began talking n're to Evans, so by way of thanks he (Evans) scored one for the Scribes himself. Cast. Green here resorted to defensive tactics with his team. It was not impregnable however. For Castick after an end to end one-handed rush beat Morgan with a beautiful shot, which was the last of

## STANDING OF THE LEAGUE

	Won	Lost	P.C.
Bellevue	7	1	87.5
Lethbridge	5	3	62.5
Blainmore	5	4	56.2
Coleman	5	4	56.2
Taber	2	6	25.0
Yukon Creek	1	7	12.5

## HOCKEY SEMI-FINALS

The provincial semi-finals in amateur hockey commence in Calgary on Sunday next, when the Camrose and Juxex team of Calgary meet. The winners of the Crow League play off at Medicine Hat and the winner of that game plays off with Edmonton who has drawn a bye.

In the junior group, Coleman plays Medicine Hat and the winner also plays the Edmonton juniors who have a bye.

## OKOTOKS TEAM IN WRONG

The Okotoks hockey team, who made a great hit with local fans last year during the play-off with Blainmore for the southern Alberta championship, seem to be in wrong around their part of the country. In a recent game at High River a free-for-all was engaged in when High River beat them 9-2, and another free-for-all was staged on their own ice last week when the Foxes team of Calgary, beat them. Secretary Barth, of the A. A. H. A., a native of Okotoks, referred the game and even he had to use his fists in the melee that was staged.

## THE GAME

The period ended with the Pharooses bombarding the Scribes' goal but Morgan was stopping everything that came his way.

**Summary of goals:** 1st period—Scribes, Chap. ell, 5 min., Pharooses, Radford, 9 min.

**Second Period—Scribes,** Cingdon, 3 min., Scribes, Bennett, 10 min.

**Third Period—Scribes,** Hamilton, 1 min., Pharooses, Thompson, 4 min., Scribes, Cingdon, 18 min. (scored by Pharooses goalie), Pharooses, Castick 19 min.

**Final Score—Scribes 5, Pharooses 3.** Casualties: McPhail in collision with Paigett in second period received a bad cut on the nose. Out for the balance of game.

**Penalties:** Green 3 min., Paigett 3 min., Bennett 3 min., Chappell 2 min., Chappell 3 min., Bennett 2 min., Cingdon 1 min., Hamilton 3 min. Totals: Scribes 20 minutes, Pharooses 3 minutes.

**Other officials of the game:** M. G. Rhynas, Timekeeper; Mr. McGinnis, Calgary, Mr. M. L. Bell, Bellevue, goal judges; Mr. W. I. Hunter, Blainmore, Scribes; Mr. W. H. Turner, Blainmore, referee; Dr. J. Oliver, physician; The Nine Rescue Teams, stretcher-bearers; Mr. Ed. Ringland, Macleod, Ice Producer.

After the game the teams and their ladies were entertained to a supper at the Palm Cafe, after which the players retired to their respective places of abode, to receive the necessary treatment to their sore spots from their better halves.

## LETHBRIDGE TO MEET BELLEVUE ON ARENA

Tomorrow night promises the event of the hockey season at the local arena, when Lethbridge and Bellevue will decide a potential game. Judging from the demand for reserved seats, every inch of space will be occupied by spectators. About five hundred reserved seats have been sold and these are distributed as follows: Lethbridge 100, Bellevue 120, Coleman 55, Blainmore 130, Hillcrest 45, Corvey and Lundbeck 30. With standing room all taken up, the attendance will be in the neighborhood of 2000.

Bellevue is now considerably in the lead and their team is in good form, while the Lethbridge lineup are said to be in better form than in the early part of the season when they held Bellevue down to 4-4 in three periods. The game is looked forward to with great interest, as the final result of the league to a large extent hinges on this game.

We understand that Bellevue will bring along their Silver band.

To get a position at the arena you will want to be there early and avoid the last minute crush.

## BENEFIT GAME VERY FAST—SCORE 6-4

The benefit game between Bellevue and Coleman at the local arena last Friday night, ended in a draw, 6-6. The game was about as fast as has been seen here this season. No scoring was done in the first period and in the second Bellevue had a four goal lead for a while, but Coleman woke up then and the period ended 5-3 for Bellevue. The final period was also very fast, Coleman managing to find the net three times, while Bellevue only located it once more. Three Blainmore players worked out each team. Arthur Kelly referred to the satisfaction of all and handed out no penalties. About four hundred fans were present.

The Bellevue Band was in attendance during the game and rendered popular selections. They were also in attendance at the dance which took place after the game at the opera house, when some 250 or more danced to the excellent music furnished. The public spirit displayed by Bellevue on this occasion is deserving of the very highest commendation.

We understand that a very substantial sum was realized and handed over to Mr. M. G. Rhynas.

## EXPLANATION

To the Hockey Fans of Blainmore: I feel that it is my duty as a member of the Blainmore Hockey Club, and also as a witness of the hockey game played in Lethbridge by your team, (over which there is so much unfair criticism of one of our players), to make this statement:

I had a talk with Capt. W. H. Turner when the trouble started and he was perfectly willing to take the penalty handed him by the referee and finish the game under protest. I feel sure that it was not through any fault of his that the team left the ice in Lethbridge.

(Signed) M. G. RHYNAS, Blainmore, Alberta.

## BLAINMORE WIN FROM COLEMAN

Last night's hockey game on the Arena between Coleman and Blainmore proved to be the best and fastest exhibition of hockey this season. The first period opened up with Coleman leading off with two goals, scored by Gates and Cosgriff. Coleman appeared to have the edge on the game in this period and Blainmore although making good shots, failed to find the net.

The second period found Blainmore a better trim and some good combination was in evidence. Pruden scored twice for Blainmore, while Graham landed one for Coleman.

In the third the game seemed to be falling in Blainmore's favor and Coleman were considerably on the defensive. Turner led off, practically unattended and scored, followed a few minutes later by Cosgriff landing for Coleman. Pruden followed, and while Turner, one of Blainmore's defense, took the fence just for a minute, Goddard scored. Turner took the ice and some fast play ended in Number Six from Pruden, the game ending in Blainmore's favor with a score of 6-4.

No. 2 for Coleman was shot by Cosgriff and entered the net of Blainmore's defense, and was not by any means the result of a good shot.

But two penalties were awarded during the game and went to Charles Graham, of Coleman's forward line and Turner, of Blainmore's defense.

Tommy Clark, of Hillcrest, referee's good game.

Owing to the stormy condition of the weather, only about seven hundred spectators were present.

Following the game, the Coleman team and Club executive were entertained at lunch at the Palm Cafe.

## THE LINEUP WAS AS FOLLOWS:

Blainmore	Position	Coleman
Emis	Goal	Johnson
McFerrer	defense	Phillips
Turner		Nelson
Goddard	forwards	Cosgriff
Pruden		Graham
Levaner		Gates
Vojprava		Hume
Jenkins		Oginski

## INTOXICATED POETRY

Deep in wilderness  
Far from man and beast,  
Let me wander in the dusk  
Thee my soul to feast!

Hidden haunts of pleasure  
Tempt me there with joy!  
Let me love myself for good,  
In the bush, O, Boy!

Think you, I've a sweetheart  
Hidden 'neath the hill?  
Guess again, I'm seeking  
Some lone, wildwood "still."

Mash and rapins stealing  
Is a luscious feast—  
From the "warm" outflowing  
Liquid happiness!

Quicker, far, than lightning,  
All your cars will kill!  
Mourning, leave your burdens  
At the wildwood "still."

—E. Lavin Bootlegger

## BLAINMORE CURLING BONSPIEL

### Competition No. 1.

1st Prize—4 Sweaters.  
2nd Prize—3 boxes Cigars, 1 fancy Chinese box of Chocolates, value \$10.  
3rd Prize—2 Pyrex Dishes, 2 Silver Cigarette Ash Trays.

### Competition No. 2.

1st Prize—4 Hams.  
2nd Prize—3 boxes Cigars, 1 fancy Chinese box of Chocolates, value \$10.  
3rd Prize—4 cases Apples.

### Competition No. 3.

1st Prize—2 Hams, 2 sacks Rona Household Flour, 50¢.  
2nd Prize—2 Fountain Pens, 2 3¢ or Ready Point Pencils.  
3rd Prize—4 cases Apples.

### Consolation Trophy

1st Prize—2 cases White Star Pickles (sour-sweet), 2 boxes Cigarettes, 2 boxes Chocolates.  
2nd Prize—4 Neckties.

Prizes were donated as follows:

Palm Cafe, 2 fancy Chinese boxes chocolates, value \$10 each; Henry Tak, 1 ham; J. Montalbetti, 2 Pyrex dishes; S. Trono, 2 Silver Ready Point Pencils; W. Scott, 2 50¢ sacks Royal Household Flour; F. S. Kewbury, 2 Ties; H. Gallay, 2 Ties; Blainmore Hardware, 2 Cigarette Ash Trays; F. M. Thompson Co., 2 Sweaters; Thall & Rink, 2 Sweaters; Dan Lewis, 2 boxes Cigars; King George Cafe, 2 boxes Chocolates; P. Burns Co. Ltd., 2 hams; W. J. Bartlett, 1 ham; Blainmore Pharmacy 2 Fountain Pens; Swift Canadian Co. Ltd., 1 ham; M. Delekey, 2 boxes Cigars; Mar Fay, 2 fancy boxes Chocolates; "Joe" 43 each; Western Canada Wholesale, 2 boxes Apples; Hudson Bay Co., 4 boxes Cigars; Plunkett & Savage, 2 cases Apples; Scott Fruit Co., 2 cases Apples; Lethbridge Mercantile Co., 2 cases Apples; McDonald Cooper Ltd., 2 dozen cases White Star Pickles (sour-sweet).

## EDIBLE BAMBOO

The Japanese edible bamboo has been successfully introduced into the southern portion of the United States by the Department of Agriculture. Several plantations are now established in Georgia and Louisiana. Popularization of the bamboo will furnish large home-grown supplies of this useful timber required by our manufacturing industries. The giant grass grows a foot a day, and its 50-foot stalk is well adapted for making frames, furniture, ladders, trellises, and barrel hoops. The very sprout is a delicious vegetable and resembles asparagus in flavor and in the manner of its preparation. There is an increasing demand for the bamboo timber and also for the edible bamboo shoot.

## IS YOUR SUBSCRIPTION DUE?

## FOR SALE--

FORD TRUCK—In first-class condition. Dominion Royal Cord Tires on rear wheels (pneumatic), sabbly tread tires in front, practically new, closed-in winter cab, removable sideboards. Will take \$550 cash for quick sale. Write or phone L. O. HARTSHORNE, Plancher Creek.

## WHAT IS TEMPERANCE?

Temperance may be defined as "The moderate use of all good things; total abstinence from all bad things." One may not lie or steal in moderation. Why? Because they are violations of the moral law written on the hearts of all men; hence lying and stealing are bad in their very nature and total abstinence is the only safe course. No two truths can contradict each other; what is physically wrong can not be morally right. The moral laws are or should be, the basis of all laws inscribed on the statute books of the State. If, therefore, it can be shown that alcoholic drinks, as beverages, can be proved to be injurious, violate physical, mental, and moral laws, then total abstinence for the individual and prohibition for the State is the only right course to pursue, in the protective interests of the nation.

In the Federal prohibition regulations, issued as an Order in Council March 11th, 1918, the strong drink prohibited is defined as follows:

"Intoxicating liquor means and includes any liquor or beverages which contains more than two and one half per centum of proof spirits."

The word "intoxicant" is derived from the Latin noun toxicum, which signifies poison. What is poison? It is defined by Sir William Gull, in his Forensic Medicine, as—

"Any substance which, without acting mechanically, but by its own inherent power, is capable of destroying life."

Alcohol, the intoxicating ingredient in all beers, wines, and spirituous liquors, is described in all works on toxicology, as a narcotic and poison, a liquid which stupefies and deadens, irritates and inflames. Dr. Benjamin W. Richardson declared in his "Diseases of Modern Life" that 30 grains of alcohol to the pound weight of the human body causes intoxication, while 60 grains to the pound weight of the body causes death.

It is true that what is poison to one organism, is food to another. Rabbits eat belladonna—a deadly poison to man—with impunity. Goats can eat as much tobacco as would kill a dozen men. Pigeons are impervious to morphine, and donkeys eat strychnine without injury. But experience teaches that alcohol acts as a brain poison upon all animated nature alike.

## CROW'S NEXT PASS HOCKEY LEAGUE SCHEDULE. 1931-22

**FEBRUARY—**  
Monday, 13, Taber at Lethbridge.  
Monday, 13, Plancher Creek at Blainmore.

**Wednesday, 15, Bellevue at Coleman.**

### THE ELECTION OF A POPE

The College of Cardinals numbers seventy and there are now living about sixty. Italians compose about one-half. There are two in England, two in the United States and one in Canada.

The college must meet on the tenth day after the Pope's death and two thirds vote is necessary for election.

There is no law against the election of a layman; but it has been traditional to elect the pope from the College of Cardinals. For four hundred years the pope has been elected from Italian cardinals.

The selection, when electing the pope, is very strict. Each cardinal has three rooms and he cannot leave the college. He is really walled in. Telephones are installed so the cardinals can talk with each other, but no connection with the city exchange.

Twice a day the cardinals come together to vote and continue to do so till a candidate gets more than two thirds of the vote. The ballots are burned after each vote, and when no smoke appears the crowds outside know that the pope has been elected. The pope, after being elected, is requested to select the name by which he is to be known thereafter.

READ THE ADS!

The workers in a dynamo factory in Moscow have elected as their representative to the local Soviet a Frenchman, Marty, one of the ringleaders of the mutiny in the French Black Sea fleet shortly after the armistice, who is now serving a term in a French prison. They notified Vojtech, the Soviet Foreign Minister, begging him to apply to the French Government for the release of Marty so that the latter could take his seat in the Moscow Soviet.

Official census figures, which are issued to the practically complete, show that Mexico has a total population of approximately 14,000,000 people, a decrease of 1,000,000 as compared with the population given by the census of the year 1910, which marked the beginning of the revolutionary period. The decrease is explained by the losses during the revolutions in killed and those who perished by hunger and sickness brought on by hard ships.

Hon. Charles Stewart is still in the cold, the people of the province of his adoption refusing to allow him a seat. An effort is now being made to secure a seat for him in the province of Quebec.

### Cowley Happenings

Mrs. Baggins is spending a few days visiting friends in Lethbridge.

Mr. Holmes, of Lethbridge, was a week-end visitor here.

Miss Freeman, who has been spending some time in Blairmore, is visiting friends here at present.

David Murphy is absent from school this week on account of a cold.

Mrs. W. E. Flaherty has returned from Lethbridge, where she had been visiting for several weeks.

Steve Cooper, who has been under the doctor's care this week, has been forced to absent himself from school.

An epidemic of colds seems to be general in this locality. Several of the pupils are staying at home during their absence.

Rev. W. H. Day, of Pincher Creek, was forced to drive to Cowley on account of bad roads last Sunday evening to conduct services here.

The dance given in the hall here on Saturday was very poorly attended. The music was furnished by local talent, namely Harry Hannan, Hilda Hannan, Miss Freeman and Mr. Holm.

Water is again scarce in town—something wrong somewhere. They are working on the pipes and everything will be working in O. K. order in a few days.

Clair Snyder, who has recently been transferred from the bank here to the bank in Blairmore, is taking an enforced vacation on account of illness and is spending a few days at his home.

In spite of the sweeping blizzard on last Wednesday night, a good crowd attended the wheel drive. The lucky prize winners were: Mr. B. O. Morrow (lik handkerchief) and Mrs. James Gilmore (dish). Mrs. Harry Hannan and Mr. Pete McEwen were awarded the booby prizes.

On account of the white drive held at Cowley and Lundbreck every two weeks coming so near the same date, the Cowleyites have decided to arrange for the drive here to be a few days apart from the drive at Lundbreck, and held their drive on Wednesday of this week.

A meeting of the directors of the Blairmore Coal Company was held here yesterday.

### Mortgage Sale.

NOTICE IS HEREBY GIVEN that by virtue of an Order made in a certain action wherein Thomas W. Head is the plaintiff and William Alexander Borthwick is the defendant, the following lands and premises will be sold by public auction at the Town Hall in the Town of Pincher Creek, Alberta, on Saturday, the 18th day of February, A. D. 1922, at 2 o'clock in the afternoon.

The North-east quarter of Section Ten (10), in Township Seven (7), Range Two (2), West of the Fifth Meridian, containing one hundred and sixty acres, more or less, saving and excepting the reservations contained in the Grant from the Crown, and the Certificate of Title of the said lands. The following buildings are said to be on the property: Dwelling house, log one story, 18x30. One stable, log, 16x28. Said buildings are in fair state of repair. Water is obtained from a small spring and stream. Sixty acres are said to be broken. Two and a half miles of fence in fair state of repair. Nearest post office, and school three miles. Nearest railway station and market town Lundbreck, three miles. The soil is said to be black loam.

TERMS of sale are as follows: Ten per cent. of the purchase money must be paid at the time of sale and the remainder within sixty days after sale. The property will be sold subject to a reserve bid.

For further particulars apply to THOMSON & JACKSON, Solicitors for the Plaintiff, Pincher Creek, Alberta. Sgd. "A. M. McDonald" L. J. S. G.

### Repairing Ravages of War

New Co-operative Societies Are Adding the Good Work in Devastated French Regions.

During the last year the co-operative movement in the devastated regions of France has made considerable progress; in fact, at the present time the greater part of reconstruction work is executed by such societies. Both the government, and the population of the devastated localities have found these methods of the greatest practical value. Furthermore, the government encourages their organization and development.

Since the beginning of 1919, 203 co-operative societies have been organized in the department of the Marne et Moselle. They have already obtained important results. On December 31, 1920, urgent repairs had been made in approximately 12,000 buildings. The sums disbursed for these repairs amounted to 124,850,000 francs (\$24,015,000 par), or 81 per cent. of the total sum paid for this purpose in the department. In 1920 the co-operative societies commenced the erection of 621 farm buildings, or 38 per cent. of the total in the department. The sum disbursed for the above purposes amounted to 26,250,000 francs (\$5,250,000 par), or 58 per cent. of the total.

### How to Find Faults in Machinery

If your automobile engine is not running as it should, and you do not know what the trouble is, get one of the new biplanar stethoscopes and make a diagnosis, as a physician does when he wants to learn what the trouble is with the interior machinery of his patient. This improved device for detecting faults in running machinery has the advantage of possessing two earpieces which entirely exclude external noises. It has a jointed rod which is placed upon the part where the noise is suspected to be, and the noise is magnified so that the location and nature of the trouble can be quickly determined.

### Loot Was Too Precious

"When the burglar emerged from the cellar, there was I with my revolver pointed straight at him."

"Did you tell him to throw up his hands?"

"Heaven, no! He was carrying a small of my home here."

### Dry Law "Demoralizing"

New York, Feb. 4.—Respect for all laws in the country has been put under a "demoralizing strain" by the national prohibition amendment, Associate Justice John H. Clarke, of the United States supreme court, said in an address tonight.

"The 18th amendment," he said, "required millions of men and women abruptly to give up habits and customs of life which they thought not immoral or wrong, but which, on the contrary, they believed to be necessary to their reasonable comfort and happiness; and thereby, as we all now see, respect not only for the law, but for all laws, has been put to an unprecedented and demoralizing strain in our country, the end of which it is difficult to see."

### One On The Mayor

During an examination in an English school the inspector began to question the pupils on punctuation, when the mayor, a pompous individual, interrupted with the remark, "It is foolish to bother about commas and such like."

The inspector flushed angrily and turning to one of the boys he bade him write on the blackboard, "The Mayor of Cheshamington says the inspector is a fool."

"Now," he continued, "put a comma after Cheshamington and another after inspector." The boy did so. The mayor got his lesson, and he kept quiet after that.

While crossing on the harbor between Sydney and New Bedford last week, a new motor launch, a 20-hp. car broke through and passed from sight off Point Esquimaux. The four occupants narrowly escaped drowning.

### Horrors of Russian Famine

Dr. Fridtjof Nansen, who is closely identified with Russian relief, expressed himself in a pessimistic manner, in a statement to London press, representative of the famine in Russia.

"It is too late to save the people of Russia," he declared. "Winter is here and they will die by the millions. Livestock is dying everywhere and if nothing is done there will presently be none remaining. Twenty American dollars will keep a horse alive, but a human life can be saved for 15 shillings; that sum would keep a man alive until the next harvest."

"You may talk about the horrors of war, but these people suffer for weeks and months before they die. Their bodies are nothing but skin and bones, but the famine stricken do not come to that state until many days have passed."

Asked if there were any truth in the reports of cannibalism, Dr. Nansen replied that there was, but said it was not widespread as yet.

"In many places the people are eating dead bodies," he added; "but in the Samara regions they are beginning to kill one another."

Scientists are now confronted with the task of finding how Freddie Padgett managed to crowd himself lock, stock and barrel into Jack McPhail's face.

Allan Hamilton returned the early part of the week from Nova Scotia, whither he had been called to the sick-bed of his father, who we learn is now on the road to recovery.

### How Human Heads Differ

Women have broader heads in comparison with their length, darker eyes and hair and less marked development of the skull, according to Miss Fleming of Aberystwith, who, according to the Daily Chronicle, gave the British association some facts and figures associated with her investigation of sex and growth features and conclusions based upon an examination of 2,500 children and 1,000 women, mostly Welsh.

She had compared these with the figures of Professor Fleury relating to men. There was a marked tendency both in boys and girls to be much more in width than in length of head. Re-examination showed that the vivid red hair of children changed into brown about the twelfth year. In the case of fair-haired children the darkening process began earlier in the case of girls than in boys.

### FREE "HOOTCH"

A Sparkling Stimulant, Full of Wit and Humor. Free copy will be sent upon receipt of your name with address complete. Write to G. Mitchell, 397 Pearl Street, Brooklyn, N. Y.

### MAIL CONTRACT

SEALED TENDERS, addressed to the Postmaster General, will be received at Ottawa until noon on Friday, the 3rd of March, 1922, for the conveyance of His Majesty's Mail on proposed contract for four years, twelve times per week on the route Bellevue and Canadian Pacific Railway Station (Hillcrest), from the 1st July next.

Printed notices containing further information as to conditions of proposed Contract may be seen and blank forms of Tender may be obtained at the Post Office at Bellevue, Alberta, and at the office of the Post Office Inspector.

## Canada's Winter Boom

Writer in Henry Ford's Paper Comments on This Year's Season of Caravals

"Canada, Now Capitalizing Her Climate" is the title of an article in the January issue of the Dearborn Independent. Henry Ford's paper, in which special attention is drawn among other things, to the winter caravals which will this year be held at Montreal, Winnipeg, Calgary and other points.

As the writer in the Independent sees it, the time is past when Canada is afraid of being considered "The Land of the Snows." Some passages from the article are as follows:

"Ottawa is talking of a toboggan slide which will extend from the Chateau Laurier, across the Ottawa River to Hull, on the Quebec side which it is claimed, will be the longest slide of its kind in the world. That the laconic description attributed to a certain Chinese—'Whirl! Walkee! Walkee! Walkee!'—shall not become too painfully realistic, it is proposed to bring toboggans and tobogganers back to the starting point by electric trolley, facilities will be provided for skating, skiing, snowshoeing, curling and many other winter sports and pastimes.

Harvard Kipling is blamed by some for the taboo which has been placed on the good old Canadian winter—for a generation it has been in disgrace. It was Canada's family skeleton and has been carefully kept from view. Kipling little knew the storm he was to raise when he celebrated the inauguration in Canada of the British Preferential Tariff of 1897 by his poem entitled, "Our Lady of the Snows," the refrain at the end of every verse of which concluded with the title phrase. The British poet was not writing of Canada's climate. "The subject was entirely political; the allusion entirely poetical. Kipling merely wished to coin a phrase which should be expressive and fairly typical. There is no doubt that snow is common to nearly every part of Canada—in winter time, of course, and is about as typical as any other climatic thing; but at the time that Kipling wrote the great prairies of the Northwest were being newly opened up; the government and the railways were desirous of inducing immigrants to go on the soil and it was felt that this object would be defeated if the impression got abroad that Canada was a land of snow and ice. Kipling's poem was read far and wide. Its political significance was not always understood, but Canadians feared that Canada had become indelibly associated in the minds of people the world over as a region of snowdrifts. So the word went out that winter caravals and everything else which might tend to draw attention to the Canadian winter were to be henceforth in distinctly bad form.

"In a certain sense Canada is climatically in a class by itself. In no other country in the world can two such distinct seasons as the Canadian summer and the Canadian winter be found extending over such a generally large area. Most countries having a summer as hot as Canada's have little or no winter. On the other hand, not many others having a distinct winter season with an abundance of snow and low temperatures have summer weather to compare with that to be found in Canada. Canada's summers are really like those of Southern Europe, while its winters are more like those of the Scandinavian countries; that is to say, taking an average of the Dominion. These two distinct seasons result in an entire change of activities, not only as regards sports and pastimes, but also in many lines of commerce.

### Faith Is Mutual

Justice Lemieux Tells New York Bar of Canada's Friendship

Speaking before the New York State Bar Association convention, Justice Sir Francis J. Lemieux, Quebec, referring to former Ambassador Davies' address on "International Arbitration," said "the question of reducing submarines which a nation may own, which proved such a burning one at the Washington conference, leaves me and my Canadian countrymen quite sober and indifferent." The peaceful relations between the United States and Canada along their three thousand miles of unfortified boundary depends, the speaker said, "on our mutual faith and good will, and our faith in treaties which, thank God, are not looked upon as scraps of paper."

For fifty years seven lights have burned day and night in front of a statue of the Blessed Virgin in one of the Catholic churches in Chicago. These lights commemorate the escape of the edifice from destruction in the great fire of 1871.

W. N. U. 1465

## Films on Farming in Saskatchewan

Illustrate Egg Marketing, Selecting a Dairy Cow and Farm Boys' Camp

Movie films on egg marketing, selecting a dairy cow and the farm boys' camp have recently been made by the visual instruction branch of the Saskatchewan department of education and will be exhibited shortly throughout the province.

The subject of marketing eggs in Saskatchewan is covered in a comprehensive way, both the right and the wrong methods being illustrated. Beginning with the farmer's henhouse, the spectator is shown the best methods of production in the first place; how the farmer should market with the retailer, how the retailer should deal with the wholesaler and the latter with the consumer; the storage of eggs, and the eggs for export being inspected by Dominion Government officials. Lastly, are some views of the work done in the poultry care of the Better Farming Plan and of the poultry plant at the College of Agriculture.

The film on the subject of selecting a dairy cow demonstrates all the various points which an expert judge of dairy cattle would look for such as the "three wedges" which the outlines of the animal should present when viewed from different angles; the soft skin; the lean short head; wide chest; well sprung ribs and strong back; the mammary development and so on. The features of the demonstration in the picture emphasize very clearly the points which are sought to be made.

The last film illustrates the doings at the farm boys' camps, which have become such a noteworthy feature of the larger summer exhibitions. The main educational value of this picture is for the parents.

## Amazing Commercial Growth of Malaya

Gifts to Britain Since 1912 Total Ten Million Pounds

British Malaya now takes up so much of the City of London's attention that one is apt to forget how very recent is its commercial growth. Though Europeans have lived at one or two points on the western coast for 400 years, some sixty years ago white man was the sole representative of his race and color in the whole interior between Singapore in the south and Bangkok in the north. The country is so rich and British in sentiment as to estimate the Imperial gift of the peninsula since 1912 at a total of £10,000,000. It presented a battle to the home government; it contributed fifty-three airplanes to the British war munitions during the Great War. The battleship, H.M.S. Malaya cost over £300,000, and was voted to the British Government in 1912.

The country, which is about the size of England, without Wales, consists of the Straits Settlement, a Crown Colony embracing Singapore, Penang and Malacca, the Federated Malay States, a Protectorate extending over Perak, Selangor, Negri-Sembilan and Pahang, the land owned by Malay sultans and administered with their goodwill, by British officials, and a number of states which have not entered the Federation.

## Wyandotte Hen Makes New Record

Pullet at Invermere, B.C., Lays 325 Eggs in Year

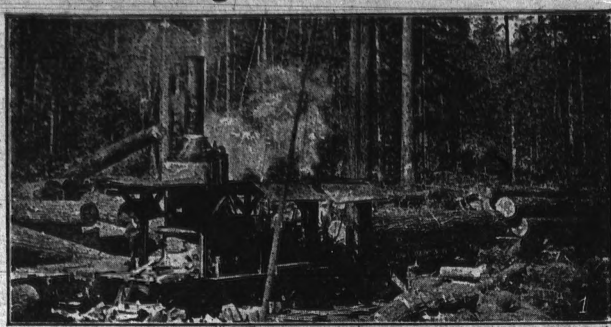

"Lady Dot" a White Wyandotte pullet, at the Dominion Experimental Station, Invermere, B.C., completed her yearly record on October 31st, producing 325 eggs during the preceding 365 days. She was hatched on March 25th, 1920, and commenced to lay in October. She was placed in a permanent laying house and trapped from November 1st. The following is her monthly egg production for the year:

During the four winter months "Lady Dot" produced 193 eggs, which is more than many pullets do in a year. From Aug. 1st to Oct. 17th, when she quit laying she laid 78 eggs in 78 days. Commencing on May 18th, and continuing until October 17th, a period of 183 days, she produced 150 eggs. "Lady Dot" did not go broody during the year, but commenced to moult on October 11th and quit laying on the 15th. Unfortunately there is no trap nest record of her eggs prior to November 1st, 1920, otherwise her yearly record would have been more. As an individual she is, if anything, small for the breed, but is the most active bird in the flock.

"Lady Dot" is from the Experimental farm flock that averaged 197.4 in their pullet year and is the result of 6 years' breeding and selection.

Resume New York-Bremen Line Resumption of the New York-Bremen passenger run with three German steamers of 9,000 tons each, is announced in advertisements appearing in New York papers. Seven and one-half years ago such advertisements disappeared from publications there.

## Lumbering in British Columbia

The greatest industry in British Columbia is lumber. Many thousands of men are employed in handling it, from the adventurous prospector who sets out for parts unknown and unexplored to look for fresh and profitable timber-lands, down to the expert polisher who finishes off the beautifully veined panel of Douglas Fir at the factory.

It is estimated that there are 400 billion feet of merchantable timber in the province, more than half the forest wealth of Canada, and experts say that over five times the amount at present cut every year could be used without encroaching too much on the timber resources of the province.

The value of forest products for 1919 was \$70,352,000, but this was largely owing to the high prices prevailing for all lumber, wood-pulp, etc. due to a world shortage and a great demand.

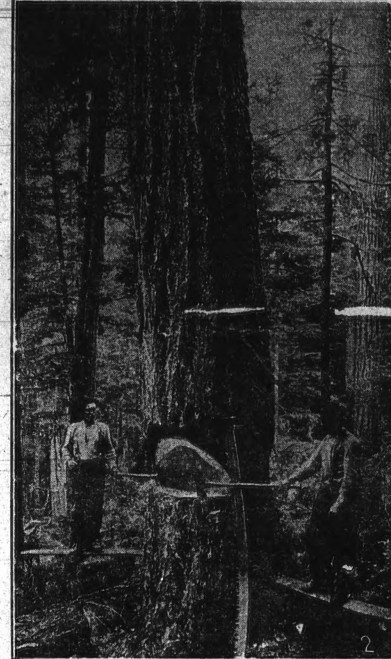

The Douglas Fir is the most famous of all British Columbia's trees, growing to a height of 350 ft. and 8 and 9 ft. in diameter. It is used for house construction, boat-building, mine props, poles, railway ties, bridge and trestle timbers and many other things.

Then there is the Red Cedar, famed all over the world for the shingles it produces, doors, frames and finely dressed panelling for lining living rooms, the Sitka Spruce for aeroplanes, and Western Hemlock for box-manufacturing and pulpwood.

Vancouver is a city of saw-mills; there is a fringe of them lining the creek and inlets of the coast around the city and one seldom looks out to sea without watching some little tug towing a huge boom of logs behind it that have come perhaps from some camp hundreds of miles away up the coast.

Who shall say the lumberjack's life is not one of the best that is? Carefree and next to nature, he spends his day in the great outdoors with the scent of the sap that oozes out of the fresh-cut cedar, the smell of the wood-smoke of his camp fires, of wet moss and bursting balsam bark.

Instead of the deafening din of restless humanity he hears the roar of a distant waterfall, the call of wild geese or the warning cry of his fellows—"Timber!"—re-echoing thro'

(1) A Donkey Engine used to draw in and load logs  
(2) Cutting down a Douglas Fir tree in B. C.

the silent forest before thunderous toll tells him that another giant fir has fallen beneath their hands.

His good day's work done, he has nothing else to think about but his so considerable lot of money waiting for him at the cook-house—and a pipe—and sound sleep.

There are in British Columbia 6

pulp and paper mills, 212 saw-mills and 70 shingle mills, so it will be realized that the lumber world in this province is a vastly important one to all those who have their being in it from the lumbering himself down to the expert sawyer who can command almost any wage he asks by reason of his rare ability.—H. G. W.

## May Find Radium in North Country

Similar Ridge in Ontario Contains Deposit of Ore

Deposits of pitchblende, the mineral which contains radium, may shortly be located in the north country of Le Pas, according to S. S. Reynolds, the mining engineer who located the Mandy mine. Mr. Reynolds is awaiting reports from a trapper upon a barren ridge in the north country on which the snow does not lie in the winter. It was discovered by him last year that a similar ridge in Northern Ontario contained a considerable deposit of the precious ore, the radium emanations melting the snow that fell on the ridge. The Ontario samples have already responded aptly to a photographic test.

### The Honors List

Of the whole list we may say that it is neither better nor worse than those things are apt to be. Apparently we are committed beyond call to the periodical shower of titles which descend in equal measure upon people who have made distinguished places for themselves and upon others whose merit may be less but who have escaped the same degree of public knowledge. The system is a thoroughly bad one, and the first list of 1922 does little to redeem it from that censure.—The Westminster Gazette.

New Elevator for Fort William Another five hundred thousand bushel grain elevator is being added to the enormous storage facilities of Fort William, according to reports. A private grain firm is building it.

## Record of Country Boys

Physical Examination Shows Them Superior to City Boys

Under the selective draft law, registrants were given two physical examinations, one by the local draft boards and another by the army surgeons after the men who passed the local board examinations reached camp. Analysis of these records of physical examinations shows that the country boys made better records than those from the cities; the white registrants better than the colored, and the native born better than those of alien birth. These differences are so considerable that 100,000 country boys would furnish for the military service 4,790 more soldiers than would an equal number of city boys. Similarly, 100,000 whites would furnish 1,900 more soldiers than would an equal number of colored. Finally 100,000 native born would yield 3,500 more soldiers than would a like number of foreign. The importance of these figures may be appreciated by noting that 3,500 men is equivalent to an infantry regiment at full war strength.—American Report.

## Acquiring Freedom

"Ireland is free," says an esteemed contemporary. Let us hope so, but let us forget that nations don't put on freedom in one puts on a garment. Nations make themselves free by the slow process of learning to use the institutions of freedom. The Irish people must free themselves from the spirit of faction, from their hatreds, from their bitter memories, before they can become really free.—Woodstock Sentinel-Review.

## Aviation Records

Figures Show Large Business Being Done By Airplane

Figures made public by the controller general of civil aviation in Great Britain show that from May, 1919, to March, 1921, 68,975 civilian airplane flights were made in the United Kingdom, averaging nineteen minutes per flight. The planes flew a total of 1,593,700 miles in the 23 months.

More than 170 tons of freight and 110,348 passengers were carried. Goods imported by airplanes during that period totalled in value \$18,553 pounds sterling and exports aggregated \$27,776 pounds.

In France civilian airplanes imported 2,641,440 francs worth of goods during the first quarter of this year, exports by air amounted to \$66,230 francs.

## Get Farm Tutition As Prize

As a reward for prodigality in the department of agriculture's various summer crop and hog or cattle competitions, 41 young Ontario farmers will obtain free agricultural tuition, either at Guelph O.A.C. or at Kemptonville.

## Scale Like Crocodiles

A Basuto native, who from his head to his knees has skin and scales like a crocodile's, has been brought to Durban, South Africa, for exhibition purposes.

London Bridge has a rent roll of three-quarters of a million dollars a year, derived from property left in the past for the special upkeep of the bridge.

## Magnificent France

Remarkable Recuperative Powers

France remains still one of the wonder nations of history. Conquered by Rome, its people assimilated Roman civilization. Overrun by the Franks, it assimilated them. Invaded by the Normans, it civilised them, and made them a part of its national life. Defeated by Germany in the Franco-Prussian war, it recuperated swiftly and overthrew its one-time arrogant conqueror. Patron of arts, it has been a leader in barbarism. Individualism in the time of peace, it has displayed marvellous unity of purpose in time of war. Light-hearted, fun-loving, it also has displayed a calm, inclusive logic that has made French thinking famous. Always underlying its seemingly volatile exuberance of thought and expression has been a deep current of seriousness which has found expression in its religious, its economic, its social and its practical life.—Seattle Times.

## Prairie Telephones

What does the name Saskatchewan suggest to you?—Is it wheat, pine forests, and prairie? That is a good beginning, but the province is also noted for its civilization. It has more telephones per capita than any country in the world, except Sweden, more automobiles than any other Canadian province. It contains 2,117 cities, towns, villages and settlements, and 115,000 farms.—Bradford Daily Telegraph, Yorkshire, Eng.

## May Predict Weather Year Ahead

Within three years Captain Ronald Amundsen, Arctic explorer and discoverer of the South Pole, expects to return to civilization from the North Pole in possession of the knowledge and power that will enable scientists to predict weather conditions for a year or more in advance.

W. N. U. 1465

REPORT OF BLAIRMORE PUBLIC  
SCHOOL FOR JANUARY

## Primary

Enrollment 37, school open 21 days, average attendance 31.92, percentage 45.56, aggregate 670.8. Perfect in attendance: Katherine Fern, Beatrice Trono, Alberta Coppe, Dennis Pire, Lily Belecky, John McDonald, Ian Walker, Charles Hayes, Edward Bonthiller.

B. E. Douglas, teacher.

## West Ward, Grades I. and II.

Enrollment 24, school open 21 days, aggregate days' attendance 387.5, average 18.45, percentage 76.87. Perfect in attendance: Ray Upton, Frank Thomson, Lorena Rowald.

S. D. McLellan, teacher.

## Grade I.

Enrollment 28, school open 21 days, aggregate days' attendance 493, average 23.14, percentage 83.09.

Paul Gray, teacher.

## Grade II.

Enrollment 47, school open 21 days, aggregate days' attendance 886.5, average 42.21, percentage 89.50. Perfect in attendance: Helen LeBlanc, Irma Aushacher, Betty Scott, Lily Violette, Margaret Patterson, Lily North, Sadie Jarvi, Olive Young, Elvina Lissa, Carmine Picciarello, James Patterson, Miller Stewart, Wilfrid Thibodeau, Jose Fossi, Arthur Williams.

E. McCaughey, teacher.

## Grade III.

Enrollment 50, school open 21 days, aggregate days' attendance 953.5, average 45.40, percentage 90.90. Perfect in attendance: Alphonse Capron George Hinds, Mike Kolashek, Joe Ho, Ernest Amatto, Bruno Rinaldi, Henry Thomson, Richard Linville, John Morency, Joe Morency, Alice Hamilton, Valma North, Elsie Knapman, Lillian McDonald, Havery Jarvis, Joan McLellan, Arnold Feron, Alice Uhrin, Rhoda Thomson, Irene Elliott.

Blanche Pinkney, teacher.

## Grade IV.

Enrollment 40, teaching days 21, aggregate days' attendance 760.5, average 36.21, percentage 90.52. Perfect in attendance: Annie Belecky, Rita Brown, Edna Christophers, Billie Elwin, Lena Fraser, James Kemp, Jules LeBlanc, Lambert Malrold, Earle McLeod, Gladys McKinnon, Anna Pozzi, James Stewart, Gladys Thibodeau, Mar Hong Uck.

C. Mearns, teacher.

## Grade V. (West Ward)

Enrollment 37, school open 21 days, average attendance 32.45, percentage 57.70. Perfect in attendance and punctuality: Vera Brown, James Lloyd, Nina Passmore, George Passmore, Percy Thibodeau, Olga Belecky, Stanley Foreman.

Vivian J. Keith, teacher.

## Grade VI.

Enrollment 41, school open 21 days, aggregate days' attendance 826.5, average 39.85, percentage 95.97.

Rhoda McLaren, teacher.

## Grade VII.

Enrollment 35, school open 21 days, aggregate days' attendance 672, average 32, percentage 91.42.

Edna M. Fulton, teacher.

## Grades VIII. and IX.

Enrollment 45, aggregate days' attendance 887, average 42.23, percentage 93.84.

M. T. Davis, teacher.

## High School

Enrollment 24, school open 21 days, aggregate days' attendance 478, average 22.7, percentage 94.83.

D. M. J. Conway, principal.

Mrs. McKinnon, mother of P. W. McKinnon, C.P.R. agent at Coleman, died at her home in Ontario on Wednesday of last week.

Mrs. Wootley, D.D., principal of the T. O. D. E., is to pay an official visit to the Blaimore Chapter.

ALARM AT DRUG ADDICT  
GROWTH

Frank Williams, writing to a recent issue of the Spokesman-Review, says that if it is true that if people cannot get liquor they turn to drugs, we are facing a most dreadful situation. As far as he could learn the condition of a section of India was fast becoming the condition of our own country. Only two years ago two hundred known addicts in the city of Spokane, and in three years the number has grown to better than 3000. A drug addict is ambitious to make as many other addicts as possible, hence the rapid growth of the habit. As a father of many children, I have made it a point to forewarn them by pointing out all methods and snares used by the drug peddler and drug user. I do not believe a drug user is ever cured. They lose all sense of honor, all respect for themselves and everyone else. The horrible question arises, are we going to be a nation of drug addicts like those millions whose religion prohibits liquor, or are we going to wake up as a nation and stop this curse which will lay us down groveling in the dirt. With thousands of funds and peddlers we have now in the United States the habit will grow so rapidly that there will be no stopping it before our fine young womanhood and manhood in great numbers will succumb to the habit. One of the inspirations of my writing this was the story of a pretty young girl stenographer who met a young man at a dance. This chance acquaintance introduced a harmless looking powder to her, told her to sniff a little in her nose and it would "put her" the knowing of dope and he was as he instructed her. She was 19 years old and from a fine family, and from that time on she bounded that young man for more of the powder. In two months after the first dose, a friend caught her using it, took her to a doctor, but it was too late, she was a confirmed drug user. Mothers, fathers, ministers of the gospel must awaken or this scourge will enter your home.

Attended by many delegates from all over the province the Annual Convention of the Alberta Division, Canadian Red Cross Society, met in Calgary on January 31 and February 1. Open sessions of the Convention were held on the afternoon and evening of January 31 and a general business session followed on the morning of February 1. One of the chief topics of discussion was the clothing relief work which the Society is carrying on in the many districts of the province where this help is urgently needed.

The officers of the Society told of the scope of this work and that the applications for relief continued to pour into the head office in Calgary. They explained that they had taken over the relief at the request of the government. Premier Greenfield sponsored their call for donations to the fund to enable them to continue their task.

Donations to this fund should be sent to the nearest Red Cross unit, or the Provincial Headquarters, O'Sullivan Block, Calgary. The Society acknowledges the following:

Previously acknowledged \$1120.25

Mrs. L. Perry, Idlesdale 6.00  
Millerville white drive 11.15  
Patricia W.M.B. Nth. Ed. 5.00  
J. Collinson, Red Deer 5.00  
Okotoks Country Club 29.00

Total to date \$1176.40

The division of Oddfellows will meet its annual session in the City of Edmonton next week. On Monday the Rubikah Assembly will convene. On Tuesday the Grand Encampment of Alberta will hold sessions. On Wednesday and Thursday the Grand Lodge of Alberta will be presided over by Major W. H. Barnett, of Lethbridge, grand master. It is expected that this year's session will be the best on record since the formation of the Alberta Grand Lodge. About eight delegates from the P.O.E. will attend.

Alberta Hotel  
Block  
Opposite Station  
Blaimore

Jay McLeod paid a business visit to Calgary this week.

Max Stern, representing the life insurance Co. in its trip to Calgary, is in town.

Dr. Snyder is relieving Miss Jessie Sheard at the coal Union bank for a few weeks.

The regular fortnightly meeting of the town council will be held on Monday night next.

At a box on February the 6th Vancouver Amazons, ladies hockey team, defeated the Calgary Regents. The score was 2-0.

An inquest was held into the accident which happened Jack McPhail at the Arena Tuesday night. A special jury was impaneled, charged to enquire as to how, where and by what means the fatal happened. After sitting on McPhail's case for a while, the jury returned a verdict to the effect that the injuries to McPhail were caused through the accidental jump of a Padgett.

The wrestling match at the Orpheum theatre on Tuesday night was not well attended, but in spite of this fact the programme was carried out. The wrestling between Tommy Lee and Young Samson proved very interesting. Lee was the taller man by about five inches, while Samson had the advantage in weight. Lee managed to throw Samson in the one hour.

One of Doc Gillespie's popular penalties to a Lethbridge player, and one of the reasons why the Lethbridge folk on older Doc's decisions satisfactory. Releat on the puck for fourteen seconds till his man came near to take charge of it. Gillespie, as referee, noticed this trick, goes up to Edale and tells him not to do it again. This offence is subject to penalty under hockey rules.

Rod McDonald has returned to The Pass, after a few months' sojourn in the Ardley district.

Duncan Marshall, former minister of agriculture for Alberta, has been appointed commissioner of agriculture for the federal agricultural department.

There passed away at Bellevue, on Sunday last, Mrs. George Klecken, following a brief illness. Interment took place at Blaimore on Tuesday afternoon.

Some slight disorganization has occurred in the fire department and the matter will likely receive consideration at Monday night's meeting of the council. A short while ago, quarters were furnished to accommodate eight firemen, and we learn that now only three or four men occupy these quarters, which is a rather serious condition.

## WORLD HAPPENINGS BRIEFLY TOLD

Sir William F. Coates was re-elected Lord Mayor of Belfast.

Following a mysterious visit of two white men in a gas boat, a young Indian was found dead in the snow in the Klitmat Indian village.

Women from the Bengal and Punjab regions were among the speakers at a non-co-operatives meeting, which was dispersed by the police. One hundred and eighty men were arrested.

Mrs. Helen Knickerbocker, 84, widow of Henry Knickerbocker, millionaire paper manufacturer, of New York, committed suicide by jumping from the eleventh floor window of her apartment.

Reports which have been in circulation abroad of the engagement of Princess Yolanda of Italy and King Boris of Bulgaria were denied in Rome, says a Havas dispatch from the Italian capital.

For the theft of \$1.75 from the poor box in the Dominion Methodist Church, Notre Dame de Grace, Montreal, Charles Girard, alias Giroux, was sentenced to a year in prison by Judge Decarie in the court of special sessions.

Captain John Fritchard, former commodore of the Cunard Line fleet, died in London recently. He was the commander of the Mauretania on that vessel's maiden voyage from Liverpool to New York in 1907. He started his life at sea as a cabin boy.

Members of the Saskatchewan Cattle Breeders' Association at their annual meeting, unanimously passed a resolution calling upon the Dominion Government to negotiate with the Government of the United States, to secure the removal of the Fordney tariff.

## Who Are Canadian Authors?

Drawing the Line is Sometimes a Difficult Matter.

Canadians. It is said, have no right to claim Robert V. Service as a Canadian poet, because he was born in England and nurtured in Scotland. Then, if we claim him as a Canadian because his work was done in Canada, we are asked what right we have to claim Gilbert Parker, Bliss Carman and others who were born in Canada and did most of their work in other countries. In the face of this dilemma we can only take refuge in the saying that it is difficult to draw the line.

We have to consider the place of birth, the place of education, where the author lived when he was doing his work and the nature of the field which he chose for his theme; and it may be that in some cases the honor must be divided. Take another case, that of Stevenson. Sir John Macdonald and George Brown were both born in Scotland; we claim both as Canadians, but somehow Brown seems to be the more distinctly Scottish of the two. One conclusion is that, there being no law or tribunal to decide, we can claim anybody we please, and we shall not be offended if there are rival claimants who pay us the compliment of sharing in our admiration. We are paying homage to the same sovereign, not courting the same lady. —The Toronto Globe.

## THOUSANDS CONVERTED

Through ignorance, many have suffered aches and pains long thought incurable. But doctors quickly turn to relief when Sciatica, Lumbago, and Neuritis are treated with Nerville. Its soothing healing powers are really wonderful. Nerville sinks in quickly. It penetrates into the nerve muscles and brings material relief. The hundred and one minor ailment that comes to every family yield quickly to Nerville. Try it. 35c at all dealers.

## Germany Building Ships

100 Vessels Are Built in Germany During 1921

One hundred vessels of approximately 480,000 gross tons, were built in Germany during 1921, according to information compiled by the American Bureau of Shipping. Of this number 18 of 86,000 tons were constructed for the Hamburg-American Line, which is developing joint services under an agreement with the American Ship and Commerce Corporation. Six ships were completed for Hapag Stittens and two for the North German Lloyd.

Five motorships were built. Only six of the vessels come under this classification, despite the previous belief that Germany was heavily committed to the motor drive.

Figures obtained by the American Bureau show 377,315 tons for eighty-two ships, an average of 4,610 tons each. If this average holds good on the other eighteen, the total would be about 460,000 tons.

Ships under construction at the end of the year are not included in the table.

"Fire" in kettles and boilers is due to the action of boiling the water making certain carbonates in the water adhere to the vessel used.

People are always trying to judge the man who thinks he can tell a funny story.

## RHEUMATIC ACES QUICKLY RELIEVED

THE aching, agonizing rheumatic aches are quickly relieved by Sloan's Liniment. For forty years, folks all over the world have found Sloan's to be the natural remedy of pains and aches. It penetrates without rubbing. You can just tell by its healthy, stimulating odor that it is going to do you good.

Keep Sloan's handy for neuralgia, sciatica, lame back, stiff joints, sore muscles, strains and sprains. At all drug stores—35c, 70c, \$1.40.

**Sloan's Liniment** (Pain's Enemy)

India Nation of Farmers

The large majority of the population of India are engaged in agricultural pursuits, nearly 300,000,000 being engaged in tilling the soil or dependent for their living upon those so engaged.

## It Tormented With Corns. Use Good Old "Putnam's."

It's really a simple thing to remove your corns, and without pain, if you use Putnam's Painless Corn Extract. It acts like magic, lifts out the corn, root and branch, leaves the skin smooth as silk. No failure with "Putnam's." 25c everywhere.

## What Pluck Did

A boy in New Jersey, eighteen years old, has shown considerable pluck & farm for \$13,500. Orphaned at ten, he undertook to make a living for his aunt and three sisters from the farm that his father had rented. Not only did he do it but he saved money—enough now to pay the first instalment on the purchase price of the property. He will come into full legal ownership when he is twenty-one years old. Opportunity still plucks—Youth's Companion.

## WOMEN AND GIRLS WANT ROSY CHEEKS

They Can Be Had By Keeping the Blood Rich and Pure. Every woman—every girl—wants rosy cheeks. They mean not only beauty, but good health. When a woman's blood is scanty or anaemic her color fades, she looks depleted, in short, poor health. For this purpose Dr. Williams' Pink Pills, which act directly upon the blood, and in this way bring about health and strength to weak, ailing people. Mrs. Isaac W. Howell, Pettitville, N.B., tells of what Dr. Williams' Pink Pills did for her as follows: "For some time I had not been feeling well. I had been gradually growing weaker and found it constantly growing harder to do my household work. I was very pale and had frequent headaches. I consulted a doctor and took his medicine for some time, but it did me no good. I found myself growing weaker and taking faint and dizzy spells. A friend advised me to try Dr. Williams' Pink Pills, and although I was nearly lost faith in all medicine, I got a supply and began their use. After a time I found they were helping me, and I steadily continued taking them, and ultimately I found that the trouble that had been troubling me had vanished. I am giving this statement in the hope that my experience will be of benefit to others."

You can get Dr. Williams' Pink Pills through any dealer in medicine, or by mail at 50 cents a box or six boxes for \$2.50, from The Dr. Williams' Medicine Co., Brockville, Ont.

## Canada Should Keep Her Cheese Industry

Large Amounts Could Be Absorbed by Foreign Markets

Whilst Canada is materially no loser in the taking away from one industry to build up another, it would be regretful if the cheese industry, in which the Dominion has achieved such renown and created such a universal demand for her product, should be permitted to decline, and it is gratifying to witness indications of a return to pristine importance before serious loss has been effected. That the dairy industry is on a wonderful scale of ascending progress there is every evidence, and there still remain the widest possibilities for profit in the industry. Practically the entire output is at the present time exported, and there is no doubt that, with the name it has universally won for itself foreign markets could absorb much more. The recent awards in London must assuredly be the occasion of fresh interest in this old Canadian industry.

Modern science knows no class distinctions, except that a man is rich or poor, official or non-official, saintly or ordinary.

Women Vote in 21 Countries. Women now possess full suffrage rights in twenty-one countries.

Minard's Liniment for Gout, Etc.

## Gray Crepe de Chine Tea Dance Frock

By Marie Belmont

Painted panels find increasing favor, as they are inevitable in achieving the irregular hemline. Sometimes flying panels show points only at the bottom, as pictured here. In other frocks, the panel top is also pointed, with its tip attached at the waistline.

Gray crepe de chine is the medium for this attractive tea dance frock. It slips on over the head and is hand-draped at the sleeves and panels in gray squirrel. A smart little squirrel choker is worn above the plain collar. The gray satin hat shows corded rolls edging its turn-up brim, while silver pins are thrust through at either side.

Time has Tested It—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried it fame beyond the seas. If it were double the price it would be a cheap liniment.

Italian Novelist Dies. Giovanni Verga, noted Italian novelist and poet, died at Rome recently at the age of 82 years. One of his best known works was *Macchia di Rustici*, from which Casavola's opera was adapted.

## Minard's Liniment for Gout in Cows

Be fair to your local merchants. Ask to see his goods, and compare prices before sending your money to the mail order houses. You will find that it pays.

## Dye Skin, Dress Or Faded Draperies In Diamond Dyes

Each package of "Diamond Dyes" contains everything you need to dye any woman can dye or tint faded, shabby skirts, dresses, washable coats, white stockings, hangings, draperies, everything like that. You can dye or tint anything you wish. Tell your druggist whether it is linen, cotton, or mixed. Diamond Dyes never streak, spot, fade, or run.

Egyptian women perform a strange ceremonial dance at funerals which archaeologists have traced back to the ancient ritual for the dead.

Many people are almost crippled with corns. But it is needless suffering which can be speedily ended with Holloway's Corn Remover.

The industry of producing motion pictures in the United States represents an investment of five hundred million dollars.

## "COLD IN THE HEAD"

Is an acute attack of Nasal Catarrh. It is the most frequent cause of colds in the head and that the use of HALL'S CATARRH MEDICINE will build up the system and render them less liable to attack. Repeated attacks of Acute Catarrh may lead to Chronic Catarrh.

HALL'S CATARRH MEDICINE is taken internally and acts through the blood on the mucous surfaces of the system, thus restoring the inflexible and sensitive nature in restoring normal conditions.

Small Packages of Catarrh Remedy, F. J. Cheney & Co., Toledo, Ohio.

What this world needs is an additional supply of men and women who talk less and say more.

Minard's Liniment for Gout, Etc.

MRS. ANNA E. HUGHES, Chicago, Ill.

Mrs. Anna E. Hughes, 32 West Elm St., Chicago, an artist who enjoys a wide and enviable reputation for skill in china painting, in relating the facts of her remarkable experience with Talcia, says:

"I have enjoyed such good health or felt so well in every way in years as I do now. Before I took Talcia I was so run down that half an hour at my work would tire me completely out and I was actually so nervous that at times the brush would fall from my hands and I would have to quit work for the rest of the day. Every night I would lie awake for hours, miserable and nervous. 'My improvement after the first few doses of Talcia was rapid and constant. I'm happy to say I'm well and strong now and feel better than in twenty years. Talcia deserves every word of praise I can give it.' Talcia is sold by all good druggists.

Her Hope. An old negro woman, standing by the grave of her husband, shook her head and said mournfully: "Poor Rastus! I hope he's gone where I 'spec he ain't."

**ECZEMA** You are not experimenting. It is a disease of the skin. It is relieved at once and cured by the use of the famous "Eczema" ointment. It is sold by all druggists, or sent by mail on receipt of price. The Eczema Ointment is sold by all druggists, or sent by mail on receipt of price. The Eczema Ointment is sold by all druggists, or sent by mail on receipt of price.

**The Canada Metal Co., Limited** A complete and authoritative work on all diseases of the human body. It is sold by all druggists, or sent by mail on receipt of price. The Canada Metal Co., Limited is sold by all druggists, or sent by mail on receipt of price.

## Save the bird in hand— The others may be hard to catch

With enough money, enough time and enough luck, a man may get back the health he has lost—or part of it.

It takes patience, too. And then there may be no success, or only a little.

It's better to save what you have than hunt for what you've lost—as the most successful health-restorers will tell you.

Much of the loss of health is due to faulty, careless diet. Wrong meals at all times and right meals at wrong times load the long-suffering digestive

organs with elements of destruction, or starve the tissues and glands of needed elements.

Grape-Nuts is a delicious cereal food which has the qualities of scientific nutrition. It supplies the full richness of those splendid food grains, wheat and malted barley, together with the vital mineral elements, so often lacking from foods. Served with cream or good milk, Grape-Nuts gives full nourishment without over-loading the stomach.

A splendid thought for breakfast or lunch, for those who would keep health—

The German Independent Socialist Party convention recently adopted a resolution sponsored by the union workers asking laborers to refuse to participate in the manufacture of munitions. The resolution also asked the men to use their influence to prevent the illegal production of arms and munitions as a means of restoring world faith in Germany's intentions.

Two colored gentlemen were engaged in conversation, when one of them became very much annoyed by the persistent attention of a large fly. "Sam, what kin' a fly am di?" "Dat am a hose fly. A hose-fly am a fly whut buzzes 'round' cows 'n' hosses 'n' jackasses." "You ain't makin' no call me a jackass?" "No, I ain't makin' no call you no jackass, but you can't fool dem hose-fies."

Alcohol is so plentiful in Cuba that it is cheaper to fill one's gas tank with it than with gasoline. In fact, eighty per cent. of the motor-driven vehicles in the island republic are run by alcohol. The price is: gasoline 44c, alcohol 25c.

Let the path of life start whence it may, and let the way be steep and thorny if it must, there are sunny fields far up the heights for those who have faith and resolution to climb them.

Little daughter didn't feel very loving toward her father just then and to her mother she went in a burst of confidence: "Was papa the first man who ever proposed to you, mama?"

"Yes, but why do you ask?" asked the mother.

"I was just thinking that you might have done better if you had shopped around a little more."

Fast friends leave you as soon as you cut down on the speed.

Taber, which has been a Catholic mission in the past, has been made a parish, with Rev. Father Murphy, P. F., in charge. Father Murphy is well known in The Pass, having looked after the work of Father Cosman here and in Bellevue, while the latter was taking hospital treatment.
